COSTS AND DAMAGES.

The "Professor" is still excited on the broke loose last week, on seeing his flaming address in the Globe. From what we have seen of the bills of costs in the Cassville Guss, and nearly all the heavy mileage was on the same side. It appeared to us that Guss had run up a heavy bill, expecting to draw it himself, and was mad because he wasn't trusted with the money.

It appears, however, that his road well as the collection of the course the lines of horizontal properties. There are more Irish in it than in any German than in any German city, excepting Berlin. Jay Gould-The Jews-The Lady Wash-Centennial—Business.

NEW YORK, MARCH 22, 1875. It was supposed that when Jim Fisk was shot, Jay Gorld had lost his right hand, and would sink into comparative insignificance, but events have shown that Fisk was simply tolerated by Gould; that Indeed it is very probable that Gould perwere amused with the burly clown's antics, the more astute schemer was quietly working at his own ends. Fisk's extravagancies concealed the actual work of the real head. of Erie. Jay Gould has once more astonished Wall street. He has gobbled the Pacific Railroads, and the Pacific Mail, and controls these two immense corporations as surely as Tom Scott centrols the Pennsylvania Central. And he did it nicely and cleanly, as he has done everything. While Congress was slashing into Congress was blasting the reputation of the managers, who probably deserved it, but whether they did or not, Mr. Jay Gould made the most of his opportunity. The stock went down to his figure and he of depreciation, which echoed the cry of outlook. It looks as though the long speil corruption till the city rang with it, and was broken—as though the country had corruption till the city rang with it, and the people, always ready to take up that cry against any one, assisted him. Now Jay Gould turns up with not only the Pacific Mail Steamship Company, with its twenty-four steamers in his hand, but he has his claw on the Peoific Ruilroad. has his claw on the Pacific Railroads .-Virtually, this little reticent man runs a line of road across the continent, and the cently, stipulated in his will that his nearonly steamship connections with and sup. est relative should assassinate the obituary plemental to it. and some horses in one of the thinly settled districts in the southern part of the State. The weather grows still more pleasant, and the days now are like those so exquisitely decribed by Lowell, when he says:

"And what is so rare as a day in June, Then if ever come perfect days, Then Heaven tries the Earth if it be in tune And over it softly her warm car lays."

. Every clod feels a stir of might, An instinct within it that reaches and towers, And groping blindly above it for light, Climbs to a soul in grass and flowers."

The grass in the fields is green and luxuriant, and the face of the country presents a beautiful appearance, the greenness of the grass and foliage, relieved here and there by the various bright colors of wild flowers, which are now blooming in great variety and profusion. The abundant rains, a couple of weeks ago, have dispelled all the fears of the farmers, and the grain crops promise finely. The wheat stands thick on the ground, and is now from four to eight inches in height. The crops last year were unusually good, but I am informed by old farmers that the promisc of a large yield was never better than it is at the present time. Almond and peach trees are now in full bloom, and all sorts of garden vegetables are already planted. Strawberries are also in blossom. A gentleman, who has a large ranche in the vicinity, told me yesterday that he had some potatoes planted in January which are now up and growing finely. One of which are now upand growing unery. One of the chief interests of the Pacific coast, is the mining interest. The mines produce gold, silver and quicksilver, with cinnabar, coal and a few other minerals of less value. The coal deposits are believed to be quite extensive, the points are beneved to be quite extensive, but, as yet, only a few coal mines have been worked, and these only partially.

The gold mines of California and the silver mines of Nevada have held, and still continue the held the fact work and a property and the silver mines of the fact work and the silver of the fact work and the silver of the silver

Now, after the lapse of twenty-five years although quite a number of miners are still working on in this way, and in small parties, yet the bulk of the gold and silver now mined staken out by mining companies. These ompanies are regularly incorporated under he laws of the State, with capital stock varying from \$100,000 to many millions, crect derricks, sink shafts, build costly stamp-mills and other machinery necessary for the reduction of the quartz, and the extraction of the precious metals. Such companies often emov hundreds, and sometimes thousands of men. The stock of all these mines is daily bought

and sold at the Stock Exchange, California street, San Francisco. California street is to the Pacific coast what Wall street is to the East-the financial centre-and the Stock Exchange bears a close resemblance to the place of the same name on Wall street, except that, street opercrators amuse themselves with the rise and fall of Belcher and Crown Point, and Ophir and Consolidated Virginia, and a host of other stocks representing the mining inter-ests of the Pacific coast. Gold and silver being the only circulating medium and measure of value here, there is no gambling in the precious metals as there is in New York.

The fluctuations of the price of minin in a day; and, to invest in mining stocks, un-less one is inside the proper combination, is an exceedingly dangerous experiment. Indeed, it is confidently asserted, and generally be-lieved, that for "ways that are dark and for tricks that are vain," the stock operator of California etroet is "nevenlier."

California street is "peculiar."

To give some idea of the fluctuations of even the best stocks on California street, I will instance the example of the Consolidated Virginia, which is now the highest priced mining stock on the coast. On the first of September last its shares were selling for \$63; in december some new developments were dis covered, and the stock commenced to rise: this caused tremendous excitement, and the stock went up until it reached \$790 early in January. After a few weeks it again subsided somewhat, and is now selling at \$445.

Blood Diseases.

Bleod Diseases.

The blood being the source from which our systems are built up, and from which we derive our mental as well as physical capabilities, how important that it should be kept pure. If it contains vile, festering poisons, all organic functions are weakened thereby. Settling upon important organs, as the lungs, liver or kidneys, the effect is most ditasterous. Hence it behooves every one these this pheal he apprently healths a most ditasterous. Hence it behooves every one these this pheal he apprently healths appearing and the same that are the same that the to keep their blood in a perfectly healthy condition and more especially does this apply at this particular season of the year than any other. No matter what the exciting cause may be, the real cause of a large proportion of all diseases is had blood. Now Dr. Pierce does not wish to place his Golden Medical Discovery in the catalogue of quack patent nostrums by recommending it to cure every disease, nor does he so recommend it; on the contrary, there are hundreds of diseases that he acknowledges it will not cure; but what he does claim is this, that there is but one form of blood disease that it will not cure, and that disease is cancer. He does not recommend his Discovery for that disease, yet he knows it to be the most searching blood cleanser yet discovered, and that it will free the blood and system of all other known blood poison, be they animal, vegetable or mineral. The Golden Discovery is warranted by him to cure the worst forms of Skin Diseases, as all forms of Elotches, Pimples and Eruptions, also all Glandular Swellings and the worst form of Scrotulous and Ulcerated Sorces of Neck, Legs or the parts and all Sanglaber 1.
