FAIRBANKS' SCALES .- We learn that notwithstaneing the general stagnation in business during the year that is now closing, no year has witnessed such a demand for Fair banks' Scales. The fact is that they are an article of manufacture to which national importance attaches. Our business men all over he country have long since come to regard hese scales as indispensable, and the endorse ment of the United States Government in the award of the contract for supplying thousands of post offices throughout the country with scales of the Fairbanks manufacture gives a fresh emphasis to the character of the firm and the quality of their work. The Fairbanks standard is not only universally recognized here, but also throughout the world, and no special American manufacture holds a higher rank than the Fairbanks' Scales. With improved machinery of their own invention and ample facilities for keeping pace with the increasing demand, an abundance of skilled labor and thorough management, the Messrs. Fairbanks enter upon the year 1876 with the prospect of a business that shall completely eclipse that of any preceding year in the history of the firm.

From the Lafayette Duily Courier. A VALUABLE WORK.

Dr. R. V. Pierce, of Buffalo, distinguished in surger; and the general practice in the profession he honors, ha made a valuable contribution to the medical literature o the day, in a comprehensive work entitled "The People's non Sense Medical Adviser." While scientific through out, it is singularly free from technical and stilted terms It comes right down to the common sense of every-day life. Dr. Pierce is a noble specimen of American man hood. He has sprung from the people; and, with many sympathies in common with the masses, has sought to ren der them a substantial service in this the great work of
