Suppose you try home make application for assistance to reach or Directors of the Poor may bind him out to labor and give him the earnings to expenses, WHAT SOME PEOPLE SAY ABOUT GARY'S INVENTIONS.—The Huntingdon papers are loud in
their praise of an inventor named Gary, who came
to that place from New York several years ago and
to that place from New York several years ago and
to that place from New York several years ago and
to that place from New York several years ago and
to that place from New York several years ago and
to the institution where the tramps are comto that place from New York several years ago and has since devoted himself to the study of magnetism, and to periceting a "magnetic" machine to supercede steam as a motive power. The editor of the Journal has seen his machine in operation, "pumping water by the hour," and has the greatest faith in the invention. It is well known to strait nower may be constructed, but—unless will not become a charge upon the public for the institution where the tramps are committed, can, at discretion, discharge them within the term of their commitment, upon not less than ten days good behavior or upon satisfactory security that the party discharged compenients to the study of magnetic machine to supercede steam as a motive power. The editor of the institution where the tramps are committed, can, at discretion, discharge them within the term of their commitment, upon not less than ten days good behavior or upon satisfactory security that the party discharged compenies to the study of the institution where the tramps are committed, can, at discretion, discharge them within the term of their commitment, upon not less than ten days good behavior or upon satisfactory security that the party discharged compenies to the study of the institution where the tramps are committed, can, at discretion, discharge them within the term of their commitment, upon not less than ten days good behavior or upon satisfactory security that the party discharged compenies the study of the committed in the study of the committed in the study of the study o constancy requisite to a motive power, or upon a plan sufficiently economical to displace steam, even if otherwise superior. We hope the inventor has succeeded in utilizing the subtile power, but the mere fact that he has made a machine to operate on a small scale, "pumping water by the hour," is no evidence of a discovery—the same the distribution before and the manager in the date of the distribution of the act if necessary. Any constable or policeman who refuses to arrest a tramp when called upon to do so subjects himself to a fine of ten dellars. The last

iniverse in its course and gives bulk and form to natter," the result to be expected from such a sonception of magnetism would not be startling. It is not magnetism which holds the universe in its course, first, because the Universe has no its course, first, because the Universe has no exposure to rough weather, are all so many The maintenance of health is often more its course, first, because the Universe has no "course,"—a more stupendous absurdity of speech it is impossible to imagine—and second, because (if the force which regulates the movements of the planets is meant) that force is gravity. If it were magnetism we would be unable to weigh bodies, as this force would not then be in proportion to the quantity of matter, but would depend upon its quality, and when a stone was loosed from the hand it might not fall to the earth, but be repelled by the magnetic force and projected off hyperbolically into space, and never return. While it is possible that the force of cohesion, which natural philosophers have taught "give bulk and form to little the force of cohesion, which natural bodies are the planets of the planets is meant) that force is gravity. If it were magnetism we would be unable to weigh bodies, as this force would not then be in proportion to health, and that is to establish, byjudicious to health, and regularity in the discharge of functions upon which will benefit the world. If the statement was made merely by the writer of the article, then the writer was evidently so unfamiliar with the subject investigated as to be open to surprise at the mere operation of a simple electro-magnetic will be subject investigated as to be open to surprise at the mere operation of a simple electro-magnetic will be subject investigated as to be open to surprise at the mere operation of a simple electro-magnetic will be subject investigated as to be open to surprise at the mere operation of a simple electro-magnetic will be subject to the discharge of functions upon which the welfare of the entire physicial organization is dependent. Health cannot be more effectually maintained than by using the Bitters. ganization is dependent. Health cannot be Hops & b........ the Bitters. Jan. 7-1m.

Och, dear cousin Pat, it's a cheery epistle Me heart is as calm as a duck-pond in June.

Though indigence binds me poor sow! in a fetter, mens, I'm seeing animals of all kinds. I've presented to the proper committees of the Leg- Yet hope snaps the links while I write yeza letter For dear as me life are yer answers to me. Now let us forget all our cares and our sorrows,

Some money to take us to Philadelphy. I've got an ould musket, 'twas borne by me father. Through mountains of slaughter at famed Wat-

A pleasure 'twill be, Pat, to lind it to you Together we'll march to the ould Quaker City; In fancy I hear the wild shout of the throng; Uniting our janius we'll wave a swate ditty To sing to the crowd as we schamper along. Is needed before we are ready to go,
And don't, as you value the weal of the nation,
To this proposition incline to say "no."

Yours, patriotically,
Dennis O'RAFFERTY, Esq.

NOTICE .- MR. EDITOR :- On Tuesday evening, the 25th, Ninth and Washington streets was quite a scene of commotion and stir, such as is not often seen in our quiet town. Whilst the family of Rev. Dolquietly conversing with a few friends, who had just stepped in, the house was surrounded and taken possession of by a large number of la dies and gentlemen, of all denominations, who without much ceremony, rushed in fully armed and equipped, and after the family had sur-rendered to them, they deposited their ammunition and arms on the table, and then called for a speech. Well, it was pretty hard work o make a speech, under such circumstances but after the command from their General Rev. Mr. Hunter, and the assurance that no harm should rssult from the capture, and also one year from the date of discharge. The lime to see that the weapons were not very Poor Directors or County Commissioners are out a few words of thanks and gratitude for their presence and their gifts. Then after congratulations and shaking of hands the mpany retired to attend the different church, bearing with them the assurance "that it is more blessed to give than to receive." It was a noble army of Christian men and wo-men, and we feel glad that we can take them be considered as repealing the 32d section of the act of June 13, 1846, declaring what perthe act of June 13, 1846, declaring what peren. The gifts left amounted to about \$50, just such things as a family needs. May the Lord richly reward them, temporally and spir itually.

A. G. DOLE.

\$1,000 CHALLENGE! PATENT LIGHTNING SAWS.

That the "GENUINE 1876" excels all others in speed, ease and simplicity, and will do more work day in and day out, than any other saw in the world, and I will back it against any responsible saw manufacturer.

This cut represents the use of my special files, made to fit the angle of the teeth, dressing both points at a single blow, making the saw the simplest, and cheapest to file in the world. The shortening of a tooth the thickness of a sheet of paper, (which is all any single tooth penetrates, leaves but little dressing necessary. For the unit dulled edges of the outside of M., the third surface of the file is all that will be needed. They are made 2d cut of highest quality. By the use of this file all difficulty is removed, and the cost of this file all difficulty is removed, and the cost of this file all difficulty is removed, and the cost of this file all difficulty is removed, and the cost of this file all difficulty is removed, and the cost of the file is all the not buck saws, four cents each. The cost of the 10 inch for cross-cuts is 50 cents each; five inch for buck saws, half price. A large stock kept constantly at my store, 80 Beakman Street, New York.

I will furnish my latest improved 1876 pattern of the cost of the 10 inch for cross-cuts is 50 cents each; five inch for buck saws, half price. A large stock kept constantly at my store, 80 Beakman Street, New York.

I will furnish my latest improved 1876 pattern of the store of the file is all the one mans saws at same price, for Cash in advance, where the Hardware Dealers do not sell the genuine latest improved Lightning Saws. Agents Wanted especial inducements. Will send C. O. D. if express charges is enclosed.

Buck Saw Blades, sent by mail.

Buck Saw Blades, sent by mail.

Receases and sent the cost in proved the Union Pacific Ballowed for the Saw Blades, sent by mail.

Buck Saw Blades, sent by mail, Postage Paid, at 75 cts. each.

Postage Paid, at 75 cts. each.

The attention of the trade is especially invited to the vindication of my Patent Saws as shown by the published Decree, Injunction and Costs of U. S. Court, of September 2d, 1875. In the meantime the other varieties of Clearing Teeth Saws have been overthrown and pronounced invalid. My patent M Teeth alone stand as the only vindicated and protected Patent for Cross Cut and Buck Saw Teeth. I shall proceed at my leisure to make it interesting to infringers, having retained excellent counsel. 28° My advice to the trade is to cease selling counterfeits of my goods. I will make any of these imitation goods at prices as low as they can be made of good material and workmanship, while I will furnish the genuine Patent Lightning.

of the year, when your COW begins to FAG and FALL OFF.

MONTH, in packages of 12 ounces each!

RETAIL for 25 cents; FIVE packs for \$1.

It is universally rewarded with one and the same report, viz: That it does all it promises. It is a purely Vegetable Compound, and will sever do an animal any harm. It is compounded upon strictly chemical scientific principles, looks different, smells different, tastes different, and is different from any one Cattle or Horse Powder in expectations. And those having claims against the same with present them properly authenticated for settlement. As a medicine it will cure all the ordinary dis-

eases of Horses, Cows and Pigs. It will keep an animal in good, sound, healthy condition, and above all, it will make an increase upon the animal product of over 25 per cent. above all, it will make an increase upon the animal product of over 25 per cent.

The cow to which it is fed, will give from one to two pounds of butter per week more on the same food. The Beef Cattle will fatten in the same proportion, sooner and better, and the Hog will thrive to the astonishment of those who try is. All we ask is a fair trial, and our word will be verified. This "CATTLE POWDER" has proved a sure preventive and a certain cure for

Chicken Cholera or Gaps.
