tines may become comparatively empty. Smoking in the Barn.

"No smoking" ought to be posted on every barn. There is not much difference between having a horse-thief around the stables and a man cleaning off the horses and tending cattle with a pipe in his mouth; and there is no hired man much meaner than the one who, when his employer comes round, slips his pipe into his pocket, or holds his hand over it, as if it were a little bird. All such fellows should be paid off, started off, and kept off. As for the farmer himself going into the barn with a pipe in his mouth, no complaint can be made , but if his establishment hurns be made; but if his establishment burns up, nobody should cry, unless it be the wife and children. Lightning and incendiaries and spontaneous combustion, combined, do not cause as many barns to be

burned as the filthy practice of smoking.

## Corn and Pumpkins.

Joseph Belden, Armenia, N. Y., has raised in a cornfield this season, 80 large loads of pumpkins. He estimates them worth \$1.50 a load to feed to his 50 cows, from which he sends milk to New York. He had also, from the same field, some very long ears of an extra kind of white corn, measuring 14 or 15 inches in length, and one ear measured 17 inches long. He has planted the same kind of corn on his farm for over 10 years, and says it has improved in quality and quantity during that time, instead of running out as some think the seed will, planted on the same piece of ground. He has however, changed fields yearly, and manured heavily every Spring before planting his corn. One

of his neighbors, who planted about four acres of the same kind of corn this season, got about 69 bushels of sound corn to the acre .- Correspondent Country Gentleman.

PERFECT cleanliness should be the rule in all stables, pens and sheds. Filth is the most frequent cause of disease. Too much warmth is not healthful. Pure air, dry beds and clean skins will keep well May 10, 1872. fed animals in sleek condition.

STEVENS: Dear Sir—This is to show that my son was taken sick in Jannary, 1864, with scrofula, which came out in large sores and ulcers on hislegs and hip. His leg was swelled more than twice its natural size. Ho had several doctors of high standing in their profession—two from Boston and three from Charlestown—without getting a bit better. He was obliged to lie wherever he was placed, for he had no use of his limbs whatever. When we had given up all hopes of his limbs whatever. When we had given up all hopes of his limbs whatever. When we had given up all hopes of his limbs whatever. When we had, given up all hopes of his limbs whatever. When we had, sive time before we could see a great change. The sores run so bad that we had to change the cloths four or five times a day.— Still, he was getting better ; for he could move his limbs and help himself a little. He was soon able to sit up in hed, and, by constant use of VEGETINS, it has cured him.— He has a lame leg, which he will probably have for Hie; but we all houssily believe, if we had used VEGETINS before we had bothered with those doctors, jit would have saved the use of his leg, and restored it to natural health.
