To ALL the Republicans of Huntingdon County.

Impelled by a sincere desire to promote the principles of the Republican Party, and to insure union, harmony and good will among its members, as well as a success at the polls in which we can all rejoice, we the undersigned, hereby unite in issuing the following call for Delegate Elections and a County Convention. In taking this step we are actuated by what an extended consultation with our friends from all parts of the county, leads us to believe is the united and spontaneous desire of all who truly lore our party, regardless of the factions into which our party has unfortunately been divided for some years past. It is earnestly hoped that all the Republicans will participate in the primary meetings, and that they may send good men as delegates, who are distinguished for their love of the party and a desire for its harmony and success, and that these selections be made without regard to past differences or divisions in the party. their love of the party area of the party area of the party and that these selections be made without regard to past differences or divisions in the party. Therefore, the Republican voters of the several Townships. Boroughs, Wards and Districts are requested to meet at their respective places of holding elections on SATURDAY, August 19th, 1876, in the Loroughs between the hours of 5 and 8, and in the townships between the hours of 3 and 8 of clock, p. m., of said day, and elect Degrates to represent them as follows:

The Liver is the great depurating (purifying) organ of the system, and has very appropriately been termed the "housekeeper" of our health. I have observed in the dissecting-room, and also in post-mortem examination of the bodies of those who have died of different diseases, that in a large proportion of cases, the liver has given evidence of having at some time been diseased. Liver affections are equally prevalent in beasts. Every butcher knows that the livers of cattle, sheep, and swine, are ten times as frequently diseased as any other organ. A healthy liver each day secretes about two and a half pounds of bile. When it becomes torpid, eongested, or if, from any cause, it be disabled in the performance of its duties, it is evident that the elements of the bile must remain in the blood, thus irritating, poisoning, and perverting, every vital process. Nature attempts to rid the system of these noxious materials by means of other organs, as the kidneys, lungs, skin, etc., THE Republican State Central Committee have established their headquarters at in the blood, times the vertical center of the system of these noxious materials by means of other organs, as the kidneys, lungs, skin, etc., which become overtaxed in performing their additional labor, and are unable to withstand the pressure.

The brain, which is the great electrical center of all vitality, becomes overstimulated with unhealthy blood, and fails to normally perform its functions. Hence there is dullness, headache, impairment of the memory, dizziness, gloomy forebodings, and irritability of temper. When the blood is diseased, the skin manifests discolored spots, pimples, blotches, boils, carbuncles, and scrofulous tumors. The stomach and bowels, sooner or later becomes affected, and constipation, piles, dropsy, dyspepsia, or diarrhea, is the inevitable result.

The following is an extract from ed in the New York Tribune, by the well known Agriculturist, Solon Robinson:

All of the farmers were of the 'well-to-do" sort, and some of them, S. Wolf's Clothing Store, who have turned their attention to fruits and market gardening, have grown rich. The soil is loam, vary-FRUIT FARM AT PUBLIC SALE. ing from sandy to clayey, and surface gently undulating, intersected with small streams and occasional wet meadows, in which deposits of peat or muck are stored, sufficient

We found some of the oldest farms apparently as profitably productive as when first cleared of forest fifty or a hundred years ago.

The geologist would soon discov-

er the cause of this continued fertility. The whole country is a marine deposit, and all through the soil we found evidences of calcareous substances, generally in the form of indurated calcareous marl, showing many distinct forms of ancient shells, of the tertiary formation: and this marly substance is scattered all through the soil, in a very comminuted form, and in the exact condition most easily assimilated by such plants as the farmer desires to cultivate.
