"National Medical Association," March 31st, 1876. JUST published by the PEABODY MEDICAL INSTI-UTUE, a new edition of the colebrated medical work entitled the "THE SCIENCE OF LIFE; or, SELF PRES-EBYATION." It treat upon MANBOOD, how lost how regained and how perpetuated; cause and cure of Exhaus-ted Vitality, Impotentey, Premature Decline in Man, Spermatorrhea, or Sentinal Losses (necturnal and diur-mal), Nervous and Physical Polytics.

This Book also contains MORE THAN FIFTY PRESCRIPTIONS for the above named and other diseases, each one Worth more than the price of proper care in the respect above mention-

In substantial muslin. Price only \$2.00. Barely enough to pay for printing.

"The Book for young and middled-aged men to read justows, is the Science of Life, or Self Preservation. The author has returned from Europe in excellen health, an Waggain the Chief Consulting Physician of the Peabod Medical Iostitute, No. 4 Builinch Street, Beston Mass."

"Republican Journal,
"The Science of Life is beyond all comparison the mosextraordinary work on Physiology ever published."—Bostom Herald.

"Hope nestled in the bottom of Pandora's box and hope hums be wince a ones who a few parts of the state.

"Hope needed in the bottom of Pandora's box and hope plumes her wings anew, since the issuing of these valuable works, published by the Peabody Medical Institute, which are teaching thousands how to avoid the maladies that sap the citadel of lite."—Platladelphic Requirer.

"It should be read by the young, the middle aged and even the old,"—Ne York Tribunderred upon any Medical Man in this country, as a recognition of skill and professional services was presented to the author of these works, March 31st, 1876. The presentation was noticed at the time of its occurrence by the Boston Press, and the leading journals throughout the country. This magnificent Medal is of solid gold set with more than one hundred India diamonds of rare brilliancy." Altogether, in its execution and the richness of its magnificant medical magnificant sets and the second medical medical diamonds of rare brilliancy.

dred India diamonds of rare brilliane.

"Altogether, in its execution and the richness of its materials, and size, this is decidedly the most noticeable medal ever struck in this country for any purpose whatever. It is well worth the inspection of Numismatists, it was fairly won and worthly bestowed."—Marsachuells Ploughman, June 3d, 1886.

"Altogether of the above works sent by mail on receipt of vice. Address PLAROUN MARSACHA."

Either of the above works sent by mail on receipt of price. Address PEABODY MEDICAL INSTITUTE, (or W. H. PARKER, M. D., Consulting Physician,) No. 4 Bulfants St. Boston, Mass., opp. Revere House.

N. B. The author can be consulted on the above named diseases, as well as all diseases requiring skill, secrecy and experience. Office hours, 9 A. M. to 6 P. M. [aug. 4-1y]

Medical.

### KIDNEY COMPLAINT

Probably there is no complaint that afflicts the human system, which is so little understood at the present time as some of the varied forms of Kidney Complaints. There is no disease which causes such acute pain or more alarming in its results than when the kidneys fail to secrete from the blood the uric acid, and other poisonous substances, which the blood accumulates in its circutation through the system. Hubstances, which the blood account through the system.

If from any cause the kidneys fail to perform the functions devolving upon them, the cumulations are taken up by the absorbents and the whole system thrown into a state of disease, causing great pain and suffering, and very often immediate death. Hence the importance of keeping the kidneys and blood in a healthy condition, through which all the impurities of the body must pass.

PAIN IN THE BACK.

There is no remedy known to medical science which has proved itself more valuable in cases of Kidney Complaints than the VECTINE. It acts directly upon the secretions, cleanses and purifies the blood, and restores the whole system to healthy action. tent to healthy action.

The following extraiordinary cure of great sufferer who had been given up by the best physicians as hopeler cases will speak for themselves, and should challenge the most profound attention of the medical faculty, as well a of those who are suffering from Kidney Complaint.

THE BEST MEDICINE.

EAST MARSHFIELD, Aug. 22, 1870.

MR. STRVENS: Dear Sir—I am seventy-one years ofage; have suffered many years with Kidney Complaint, weakness in my back and stonach. I was induced by my friends to try your Vegetine, and I think it the best medicine for weakness of the Kidneys I ever used. I have tried many remedies for this complaint, and never found so much relief as from the Vegetine. It strengthens and invigorates the whole system. Many of my acquaintances have taken it, and I believe it to be good for all the complaints for which it is recommended.

Yours truly,

JOSIAH H. SHERMAN.

PRONOUNCED INCURABLE.

tities, frequently accompanied with blood and excrutating pain.

I have faithfully tried most of the popular remedies recommended for my complaint; I have been under the treatment of some of the most skillful physicians in Boston, all of whom pronounced my case incurable. This was my condition when I was advised by a friend to try VEGETINE, and I could see the good effects from the first dose I took, and from that moment I kept on improving until I was entirely cured, taking in all, I should think, about sib bottles. It is indeed a valuable medicine and if I should be afflicted again in the same way, I would give a dollar; dose, if I could not get it without.

Respectfully,

J. M. GILE.

361 Third Street, South Boston.

NEARLY BLIND.

When eight or nine years old I was afflicted with Scrofnla, which made its appearance in my eyes, face and head, and I was very near blind for two years. All kinds of cperations were performed on my eyes, and all to no good result. Finally the disease principally settled in my body, limbs and feet, and at times in an aggravated way.

Last summer I was from some caase weak in my spine and kidneys, and it was at times very hard to retain the urine. Seeing your advertisement in the Commercial, I bongh't a bottle of VEGETINE, and commenced using according to directions. In two or three days I obtained great relief. After using four or five bottles I noticed it had a wonderful effect on the rough, scaly blotches on my body and legs. I still used Vegetine and the humorous sores one after another disappeared until they are all gone, and I attribute the cure of the two diseases to Vegetine, and nothing else. When eight or nine years old I was afflicted with Scro nd nothing else.

If I am ever affected with any thing of the kind again I shall try Vegetine as the only reliable remedy.

Once more accept my thanks, and believe me to be,
Very respectfully,

AUSTIN PARROTT.

Diseases of the Kidneys, Biadder, etc.. are always un-pleasant, and at times they become the most distressing and dangerous diseases that can affect the human system. Most diseases of the kidneys ari e from impurities in the blood causing humors which settle on these parts. Vegetine excels any known remedy in the whole world for clean-ing and purifying the blood, thereby causing a healthy action to all the organs of the body.

VEGETINE IS SOLD BY ALL DRGGISTS.

## Farm and Household

Watering Houes Plants.

If the causes of failure where plants are cultivated in windows were minutely investigated, the system of watering would ply of that element, a good drainage being previously secured, in order that all superabundant water may be quickly carried which is escential to the well being of all plants in an artificial state, all the lower roots would perish for water, and the plant would become sickly and eventually die. In many instances when the contents of flower pots are sprinkled daily with water. the soil in the middle becomes hard and dry. When the ball of earth becomes dry and surface waterings do not accomplish the object. In this case set the pot in a pail of water, and let it soak until the earth is thoroughly wetted through. If

off the shoots which may start to grow out of place. The red spider is quite averse to mois ture; the green fly, however, likes it, but 330 North Sixth Street, Philadelphia may be destroyed so readily by tobacco

smoke that only neglected plants will suffer

from this cause. The mealy bug is so

large that it may be easily picked off. Watering must be properly attended to; and while the plant must not suffer from lack of moisture, the roots must not be kept saturated with water. The sound of the pot when struck by the knuckles is quite different from what it is when dry. This, and the lagging look of the plant, will indicate that water is needed. A little practice will soon enable one to anticipate the wants of the plant and to supply water at the proper time. Plants growing in a cold atmosphere will be found to flourish much better by giving them water which is almost hot. House plants that have bloomed freely during the winter should be denied their usual supply of water, and be placed in the open air for a few hours during the middle of bright days, if this course is practicable.-Scientific American.

Raising a Calf.

A farmer's wife writes to the German-

town Telegraph the following description of her method of raising and fattening a calf upon skimmed milk. In a cheese dairy there would be little if any profit in such a method of raising veal calves, but where butter is the only object, or in case it is desired to raise a puculiarly valuable calf it would be possible: My principal object, is to show farmers and others that they can raise, even their veal calves without giving them the new milk fresh from the cow. The best food to fatten a calf. without whole milk is oatmeal, molasses and skim milk for the first two weeks, after which a little oat or barley meal may be used. A calf can be made to weigh one hundred and twenty to one hundred and forty pounds at four weeks old, never having had any new milk after the cow's milk was good. The oatmeal should be scalded and allowed to form a thick mucilage before being mixed with the skimmed milk. The molasses may be added directly to the milk and the whole may be given blood warm. The proper quantity for a young calf is a tablespoonful of oatmeal, parts, for one day's feed, added to the milk. After the first week, it may be gradually increased, and at the commence-which states of the third week, a speonful of outs. ment of the third week, a spoonful of oatmeal and molasses may be added, but this should be cooked. At present prices, the whole feed will not cost more than one dollar for five weeks, and an early calf of the weight mentioned will bring from ten to twelve dollars. I raised one late in the season, two years ago, by this method, that season, two years ago, by this method, that cost less than one dollar for feed, aside from the skimmed milk, and brought nearly ten dollars. Should they have scours give them a tea made by boiling corn-cobs

Suggestion About Wool.

in water, and add to the milk.

The New York Herald very pertinently says: It will always be best for a farmer to produce wool of one sort or the other. Wool that is neither one thing nor the other, neither long nor short, will not usually command a satisfactory price so readily as if it were either the wool clipped from Merino sheep or from the backs of some long wooled breed. An intelligent dealer in wool assures us that good delaine wool should be at least three inches in length, and be a round, strong staple. The practice of buying wool at an average price per pound, without regard to its quality or condition, is paying a premium for and encouraging the poor and dirty wool, for grease and filth cost but a trifle per Ib. compared with choice, clean wool. Wool growers who raise wool above the average as to quality and condition can do better than to sell it at an average price by sending it to a reliable commission merchant, where it will be sorted and sold according to its merits. This is a safe and satisfactory way to sell very good wool. It is not to be expected that wool buyers will advise farmers thus to dispose of their wool, for it deprives them of all the commission for buying, besides LONDON HAIR COLOR RESTORER some twelve cents per pound extra in addition for all the delaine wool sorted out by them.

THE farmer must strive to increase the

### TO ALL! A Solemn Warning! WE,

B. OPENHEIMER & SONS, valuable preparations, entered upon his profeser with the important advantage of a regular claim the following caution to all the trusting people of this county, and to open the in the eyes of the truth loving: It having come to our knowledge that a certain class of

> onstrated its high Tar, and in other knowledge equality of goods, and by trying to undersell us, compel people to buy of them? But they seem to have forgot. ten, if they ever knew it, that the straight path is the best, and instead they choose to follow the path of crookedness, with its natural consequences of falsehood, and blindness to all that common sense dictates. We are astonished to hear a man talk of shoddy trash who advertises one of the necessities of life, namely calico, one of the commonest trashes (to use his refined expression) the universe can boast of. It has been remarked to us that a man who offers the best Madder prints, an article which would be easily mistaken for a poor imitation of cob-web, must be either a knave, or a fool, or both. He either imagines he can fool his enlightened fellow-citizens with

SOFTWORDS and bland smiles, or thinks they are not able to tell the difference, which would bring him under the humbugs. Having probably been living in the city for a short time and listening to the harrangue of street peddlers, now tries to imitate their style and tricks on an enlightened public, by advertising an article, which he either never kept, or never intends to sell at the advertised price. As they have posted in the city

"BEWARE OF PICKPOCKETS!" we are to post up in front of such people's honses, BEWARE OF HUMBUGS and would do a lasting favor to all our fellow citizens. As a wolf in disguise is difficult to detect, except by a practiced eye, but when in his true hide everybody will be forewarned and therefore forearmed. LISTEN! LISTEN!

Prof. SILLMAN, State Chemist of Conn. Prof. C. W. SHRPARD, Jr., State Chem Prof. W. C. TILDEN, Washington, D. C. Prof. JOHN DARLY, New York. Prof. JOHN DARLY, New York.
All of whom agree in pronouncing it WITHOUT FAULT and FREE FROM ANY DELETERIOUS SUBSTANCE WILLTEVER. It has
now been some time in use for hospital and other
medicinal purposes, where of unalasts are required,
and it has been noted that in delicate and critical
cases when used, that there was an entire absence
of the nervous requirection, and continue absence

for Mechanical, Medicinal, Saera-mental and Family purposes. A shence of headaches and other disagreeable aftereffects so often experienced in the use of all brands. This is a direct consequence of the p

APPLE JACK.
