For the principles by which The World will be governed in its discussion and treatment of all public questions, it will suffice to say that The World, while conservative in politics, desires the conservation only of what is good and wise in our public institutions and our political system; liberal in spirit, it admits no limitations upon the rights of private judgment and the aspirations of Reform, save those which are imposed by prudence, decorum, and a rational respect for vested rights and for the honest opinions of all classes and sects of men. While it has labored for the principles and haits the triumph of the Democratic party as affording us a practical promise of Reform in our public administrations, city, state and national, it will not be blindly devoted to the advancement of any party or any clique. It will freely canvass the public conduct, while it will treat with respect the private rights, of Public Men, and it will examine fearlessly into the workings of our national, state and municipal govern-

law; it will endeavor, in a word, to make its columns a terror to evil-doers and a praise to them that do well. Nor will it lose sight meanwhile of the great and legiti-mate demand of the reading public for entertainment. The Wonto will keep its readers informed of all that is amusing as well as of all that is momentous in the move-ments of society and will spare neither trouble nor ex-pense to provide them with a varied animated and accu-rate picture of the times in which we live.
