Farmers are certainly slovenly in making and preserving butter, and much that comes into market is very inferior in quality; but if a good, sweet cleanly article is purchased, it is often spoiled by the conditions under which it is kept by the purchaser. Butter is a substance extremely sensitive to surrounding influence, and any odors in the vicinity where it is stored are rapidly absorbed, even if it is in a closed firkin. Great complaint is often made by the purchasers of the "gilt-edged" butter, produced from the famous dairies in the vicinity of this city, that the enormously high-priced article is soon spoiled after delivery to the customer. And no wonder! It is often placed in an uncleanly ice chest along with cooked or uncooked fish or meats, and other odorous bodies, and it soon tastes or smells like the unsavory substances with which it is associated. If not placed in the ice chest, it is often put in the cellar with decomposed vegetables or meats, and hence the delicate taste and odor are soon changed. Great care must be used to preserve butter, and it will not do to trust it to the Bridgets of the kitchen, who know nothing and care for nothings Those fond of the delicate freshness and sweetness of the best butter should have a cool place in the cellar, where it can be kept apart from everything else. The wealthy can furnish such a place with a little care and skill, and few are so poor that they cannot contrive to keep butter under better condition than they do .-Journal of Chemistry.

How to Milk.

Seme milkers seize the root of the crushed humanity might have an avenue teat between the thumb and foreinger, and of escape. then drag down until it slips out of their grasp. In this way the teat and udder are often severely injured. The proper mode of milking is to take the teat in the entire hand, and after pressing it upward, that voice of angels calling from beyond, and it may be filled from the capacious milk sees their white banners waving her onreservoir above, to compress it first at the base between the thumb and forefinger, then successively by each of the three succeeding fingers until completely emptied. The teat is at the same time gently drawn upon, but any severe traction is altogether unnecessary and highly injurious. The cow should always be milked regularly and the milk entirely drawn off. If the milking is properly and seasonably done there is little danger of disease of the teats or udder. More cows are ruined from faults of this kind than from all other causes, and the readers of the Rural World will do well to avoid them .- Rural World.

When I Am Old.

When I am old, and, oh! how soon Will life's sweet morning yield to noon, And noon's broad, fervent, garnest light Be shaded in the gloom of night, Till, like a story well nigh told, Will seem my life—when I am eld. When I am old-this breezy earth Will lose for me its voice of mirth— The streams will have an undertone Of sadness not by right their own; And Spring's sweet power in vain unfold In rosy charms—when I am old. When I am old, I shall not care To deck with flowers my faded hair;
'Twill be no vain desire of mine,
In rich and costly dress to shine;

Bright jewels and the brightest gold Will charm me not—when I am old. When I am old, my friends will be Old and infirm, and bowed like me;
Or else their bodies 'neath the sod,
Their spirits dwelling safe with God,
Their funeral knell will long have toll'd
Above the rest—when I am old.

When I am old, I'd rather bend Thus sadly o'er each buried friend, Than see them lose the earnest truth, That makes the friendship of our youth; Twill be so sad to have them cold Or strange from me-when I am old. When I am old-oh! how it seems Like the wild lunacy of dreams, To picture in prophetic rhyme, The dim, far distant, shadowy time; So distant that it seemed o'er bold Even to say-"When I am old."

When I am old-perhaps, ere then, I may be missed from haunts of men; Perhaps my dwelling will be found Beneath the green and silent mound! My name, by stranger hands enroll'd Among the dead—ere I am old.

Ere I am old—that time is now,
For youth sits lightly on my brow;
My spirits buoyant, happy, free,
Life has a thousand charms for me—
Charms that will long their influence hold Within my heart-ere I am old. Ere I am old-oh! let me give

My life to learning how to live; Then shall I meet with willing heart An early summons to depart; Or have my lengthened days consol'd By God's sweet peace—when I am old

VEGETINE.

IS RECOMMENDED BY ALL PHY SICIANS

SICIANS.

Valley Stream, Queens Co., Loug Island, New York.
Ms. H. R. Stevens:—

Dear Sir.—I take pleasure of writing you a small certificate concerning Vegetine prepared by you. I have been a sufferer with the Dyspepsia for over forty years, and have had the Chronic Diarrhoca for over six months, and have tried most everything; was given up to die, and did not expect to live from day to day, and no physician could touch my case. I saw your Vegetine recommended to cure Dyspepsia. I commenced using it, and I continued doing so, and am now a well woman and restored to perfect health. All who are afflicted with this terrible disease, I would kindly recommend to try it for the benefit of their health, and it is excellent as a blood purifier.

By Dr. T. B. Forres, M. D., for Mrs. W. II. FORBES.

Vegetine.—When the blood becomes lifeless and stag nant, either from change of weather or of climate, want of exercise, irregular diet, or from any other cause, the Vegetine will renew the blood, carry off the putrid humors, cleanse the stomach, regulate the bowels, and impart a tone of vigor to the whole body.

VEGETINE

FOR CANCERS

AND CANCEROUS HUMORS. DOCTOR'S CERTIFICATE.

ASHLEY, WASHINGTON Co., ILL, Jan. 14, 1878.

MR. H. R. STEVENS:—

Dear Sir.—This is to certify that I had been suffering from a Rose Cancer on my right breast, which graw very rapidly, and all my friends had given me up to die, when I heard of your medicine, "Vegetine, recommended for Cancer and Cancerous Humors. I commenced to take it and soon found myself beginning to feel better; my health and spirit both felt benign influence which it exerted, and in a few months from the time I commenced the use of the Vegetine, the Cancer came out almost bodity

ALL DISLASIS OF THE BLOOD.—If Vegetine will relieve pain, cleanse, purify, and cure such diseases, restoring the patient to perfect health after trying different physicians, many remedies, sufforing for years, is if not conclusive proof, if you are a sufferer, you can be cured? Why is this medicine performing such great cures? It works in the blood, in the circulating fluid. It can be truly called the Great Blood Purrifer. The great source of disease originates in the blood; and no medicine that does not act directly upon it, to purify and removate, has any just claim upon public attention. READ IT.

VEGETINE

I REGARD IT AS A VALUABLE FAMILY MEDICINE.

Ma. H. B. Stevens:

Dear Sir,—I take pleasure in saying, that I have used the Vegetine in my family with good results, and I have known of several cases of remarkable cure effected by it. I regard it as a valuable family medicine.

Truly yours,
