The cellar under the building at the corner of Fifth and Washington streets has been the favorite resort of gentlemen of leisure during the reign of the "heat fiend." The Juniata Tribune is in error in stating that the car inspectors in this place have been discharged from an employ of the P. R. R. They have been transferred to another job. Our friend, R. The powers that be at Washington will be doing the reading public a benefit if they will compel the route agents on the mail train, who are in a hurry to get out of the city, to discharge their duties, or fill their places by men who will. For two or three weeks past scarcely a day passes that one or two of the route agents do not leave the city and go to the depot, where they are to be met at stations east of this place, or else carried further west. Some of these packages, in the course of two or three days, are sent to the depot, where they are to be met at stations east of this place, or else carried further west.
