Is it worth our while to follow this cunnonsense which he gave us about National bank currency. It seemed a cheap rating he talked so loftily about the paper currency of Venice as a non-interest bearing currency. And what must he have thought of the practical common sense of the people when he said we would have a much better financial system, a safer and more satisfactory currency, if the Government would issue all the currency and abolish all the National banks with their subordinate issues, and that, as things are. How this would be better, he did not explain. How it would be safer or cheaper to the people, so long as the Government bonds exist, he did not and cannot show. Let any man show, if he can, how \$90,000 would be better secured than it now is by the deposit of \$100,000 in bonds with the Government as security for the redemption.

proving that anything would be gained by the people if, with such security as is furnished by the bonds, the Government, with all its other great cares, should assume the business of attending to every private citzen's bank account without the intervention of some such agency as a National bank. No wonder that the man, after all his vain tirade against currency, banks, It is generally believed that Rev. Now Mr. Mason knows, or ought to know, that issuing paper mon. ey, at all, by the Government, is only justified by the Constitution AS A WAR MEASURE, and not desirable as a measure in time of peace. But "the Republican party paid no attention" he says "to the Constitution," and left us to infer that we
