The law of 1878, under which the re organization has been made, provided for the expenditure of the gratuity of the State in fatigue uniforms and equipments, until every organization was fully equipped for active service. Under this provision, those of the troops, who were without uniforms and equipments acceptable to the Adjutant General, were supplied, during pattern and standard. Steps are now being taken to supply the troops with great coats, the officers and men having with commendable spirit, given the payallowed for attendance at the annual inspection, for that purpose. In-stead of extending the equipment over a number of years, and taking the cost from the annual gratuities, it would be more satisfactory if the State would appropriate, be amply repaid in the readiness of the guard for active and continuous duty, and its increased spirit, from a sense of efficiency and appreciation of a substantial recognition of its services and worth.

The report of progress of the Board of Commissioners of the Second Geological Survey of Pennsylvania will be laid before you. The present appropriation will carry them to the end of 1879, and an additional appropriation of \$100,000 for 1880 and 1881, will be required to complete the work. A catalogue of the large collection of books and specimens made by the surveyors during the progress of the work has been published, and I again invite your attention to the necessity of providing for the exhibition and preservation of these valuable scientific objects. The survey has already cost the State much more than original esmates, but its thorough prosecution to the end will give us a final survey, upon the accuracy of which the business cutterprise and scientific research of future ages can confidently rely. I shall therefore make no apology, even in the present state of our finances, for recommending the appropriations necessary to complete the survey and publish and preserve its results.

CLOAKS

Our success in filling the wants of those wanting an outside covering is not one of luck, but of study, constant inquiry and long experience in the making as well as selling these garments. No part of our house requires such untiring watchfulness, no kind of merchandise is so worthless when out of style as a cloak—no department is more active in the season of selling.

The materials used this season are Diagonals, in various widths, Matelasses, Fur Black Beavers, Silk Matelasses and Plain Silks; also, a rough-faced material called Camel's Hair, which is new, but not very pleasing to the eye.

The articles used for Trimmings are Velvet, Gros Grain, Grass Fringe, Fancy Gimps and Braids. As to shapes, the new things are of the Mantle order, but with a sleeve much more comfortable and yielding than garments of this character have been heretofore; the general effect, too, is more graceful and pleasing. The Sacque, though, retains its old popularity, and is bound to be the leader with the majority. In shape it differs but little from last season.

CHILDREN'S CLOAKS, from the smallest size up, have our best attention. They are made of Blue and Brown Beaver, Matelasse and Fancy Cloths, and cost from \$4.00 upward.

SHAWLS.

The great variety of styles, materials, colors and weights wanted in a Shawl for different season s and occasions, requires a most extensive stock to be able to suit even a majority of consumers. We are in condition now to suit more than a majority, having the greatest collection of staples, as well as novelties, in this line ever shown in Philadelphia—including even the rich fabrics of India, where years are often occupied in producing one Shawl.

No department has received more personal attention than the Shawls, the buyer having visited Europe during the summer, and not only bought very largely of ready-made, but ordered made many styles which could not be procured otherwise. Those having a taste for the novel as well as beautiful in Shawl's, should look through our collection.
