THE LATEST INVENTION IN USEFUL OUSEHOLD ARTICLES .- Within the last few years there has been expended a great deal of nventive thought and genius upon what may properly be classed as household articles, the most noted results of which are the production of the sewing machine, the wringer, the washing machine, the carpet sweeper, &c. Almost every week we chronicle the advent of some new invention by which the cares and labors of housekeeping are lessened, and woman's

work made easier.

The newest thing to challenge our attention and gladden the heart of the housekeeper, is, what is called the Novelty Brush Holder, CARPET STRETCHER and SWEEPER, a very simple contrivance designed to firmly hold in position any kind of a brush or duster; having an ex-tension handle that enables one to wash or dust windows, walls or ceilings without the aid of a step ladder. EAU GO COLOGNE de SANDALINE is the concentrated essence of the juices of the Sandal Tree, to which is superadded the odor of the most fragrant flowers. Discarding the formulas of the most renowed preparations, I have blended, by a delicate interweaving of ingredients, the most exquisite perfumes known to the Laboratory of Science, and given to the world an article, at once grateful and enjoyable. In the Tellet and the Bath it will revive the boasted traditions of the harem. The Eau de Cologne de Sandaline retains the odors of the tree whence it has been carefully extracted. To the invalid it will be found revivifying, diffusing wherever and whenever used a most salutary perfume. It is put up in cut glass bottles, elaborately engraved, and covered with rich Satin, handsomely labelled. It has found its way into the capitals of Europe, and received the indorsement of the Crowned Heads of the Old World, first heralded to the continental potentates by Eugénie in the palmy days of the régime of Napoleon III.

This indispensable volume is a carefully prepared Treatise, covering over 250 pages, and comprehended within a portable compass. It contains the most valuable information ever imparted to the human understanding. It touches upon every conceivable subject, the Anatomy and Physiology of the Body, the diseases that affect it, how they may be avoided, and how cured. Repoints out the hindrances that often stand in the way of matrimony, and gives the remedies for their removal. It indicates the unhappiness that often springs from Barrenness, and shows how Nature may be aided, until Fecundity becomes assured. In short, it enables each individual to become his own Physician.
