

LOCAL AND PERSONAL.

Brief Mention—Home-made and Stolen. Shoo fly. Pay the printer. Daylight is waning.

The trout season closes on the first of August. The great electric light is used in Cole's circus.

Henry & Co., have broken ground for the foundation walls of their new mill. The "saw-houses" of the Juniata Valley are enjoying themselves at Cresson to-day.

The prettiest girl in Huntingdon don't intend going to the sea shore this season. W. W. Cole uses the great electric light to illuminate his mammoth exhibition tents.

One of Cole's agents says that the electric light is "a beacon blaze, without blur or blot." Seventy-four thousand shingles will be required to cover the new school building.

The Stone Creek Sabbath school will picnic in one of the groves near Grafton, on the 29th inst. Allen's fanning head bath is just the thing to grow in popular favor during the reign of the dog star.

The Union Temperance Prayer Meeting will be held in the Stone Creek Chapel this (Friday), evening. The oats crop, now being harvested, is one of the best that has been known in this section for years.

The wonderful electric light produces a dazzling and bewildering effect, and is used in Cole's circus. Secretary of the Commonwealth, Col. M. S. Quay, was in town on Saturday morning, en route for Bedford Springs.

The new school building presented a busy scene last week with twenty carpenters engaged in shingling the roof. A half dozen or more of our citizens took advantage of the low excursion rates last week and hied away to the sea shore.

People learn wisdom by experience. A man never wakes up his second baby to see it laugh, but always keeps Dr. Bull's Baby Syrup handy. A new-fangled hand organ made music for the gamin, in this place, on Saturday last. It was intended to replace a brass band with the drum left out.

On Saturday night, as usual, the quiet of our town was disturbed by the howl of the crowd of young men who set this night apart for a drunken spree. Our merchant friend, J. R. Carmon, accompanied by his son, John K. Carmon, will start in a few days for Colorado, whether they go for health and pleasure.

Donald, who escaped from Fort Irwin, on the 27th ult., was re-captured, on Sunday last, in a house in West Huntingdon, and again placed in his old quarters. The Mooreville camp meeting will commence on September 11th, to continue one week. The grounds have been improved and beautified since last year.

Our streets were deserted on Sunday, everybody "and all their relations" having spent the greater part of the day at the camp meeting of our colored friends. Irene, a daughter of our old-time friend, T. W. Grafius, esq., of Tyrone, took, by mistake, the other evening, a dose of white hellebore, and narrowly escaped death.

Geo. R. Oldick was suddenly called to Curwinstown, Clearfield county, on Thursday of last week, on account of the sickness of his wife, who has been visiting friends in that town for some time past. The great Cole show which is to be here on Wednesday, August 6th, uses the wonderful electric light to illuminate its canvas, and it is said to produce an effect as sparkling and shining as a summer's sun.

Nothing removes an incipient cold more quickly and pleasantly than a reliable cathartic remedy, such as that old and tried remedy, Dr. Bull's Baltimore Pills, used by thousands of families throughout the land. Price only 25 cents.

D. G. Nash and Martin Piper, inmates of the National Military Hospital for disabled and aged soldiers, at Dayton, Ohio, having been granted a thirty days' furlough are visiting friends in this place. They are loud in their praise of the beauties and comforts of that institution.

The Lewistown Sentinel says, "for C. J. Corbin's views of Lewistown ten cents is asked, and no takers." If the views of Lewistown are no better than those of Huntingdon, taken by the same gentleman, we believe, a year or two ago, they are dear at half the money.

The Catholic paragon, in this place, has been improved and beautified by a handsome new portico having been put in front of it and the brick work painted and penciled. Mr. John Rohland, a skilled workman, did the painting, and it is a job of which he need not be ashamed.

Quite a number of strangers are spending the heated term in our town, and among them are several passably good-looking young ladies, who are playing the very mischief with the hearts of half a dozen of our young men, some of whom devote their entire time in paying attention to the fair visitors.

If boys show a natural liking for scaling fences and climbing trees, do not break them of it. In the married days to come this accomplishment may be of inestimable value in escaping matrimonial conflicts by quietly climbing up the back shed at midnight and getting in the second-story window.

Gen. U. B. Lewis, Col. C. Long and Maj. W. F. Johnston, of our town, spent a night and one day up the Raystown Branch, on fishing expedition, and returned home on Saturday evening with thirty-eight large bass as a trophy of their skill with rod and line. This is the best catch of the season.

Any soldier who may have lost his discharge from the late war, can procure a "certificate of discharge," which is substantially the same, by making application to the Adjutant General of the Army, War Department, Washington, D. C. It is not necessary to apply to a claim agent or any person else, but make application direct.

The present dog law of Pennsylvania is hard on canines, and there is greater inducement than ever for them to be well-behaved. The owner of a dog in the habit of barking at horses or passing vehicles is held to be liable for the damage done, while the owner of a vicious dog can be compelled to restrain him at his peril.—Ex.

The work of quarrying stone for the new penitentiary was commenced on Monday last, in Fisher & Son's quarry, about one mile distant from the grounds. We understand that Mr. Kelly, the contractor, proposes to have all the masonry completed before cold weather sets in, and with this object in view he will put a large force of men at work.

The famous caterer, Westbrook, of Huntingdon, to get even with the Camp Meeting folks, who had a special law passed forbidding transient stockholders to attend the camp meeting without permission of the camp authorities, recently bought a piece of ground near the front of the Newton Hamilton camp grounds, took out a mercantile license, and is already keeping store there!—Lewistown Democrat.

Our special friend, Prof. J. H. Brumbaugh, has been promoted to the principality of the Huntingdon Normal School to fill the vacancy caused by the death of the late principal, Prof. J. M. Zuck, deceased. This institution has met with unprecedented success—scarcely two years old, its elegant and commodious new building is already filled with students, and a faculty comprising ten teachers.—Military Herald.

A Grangers' tri-state picnic, composed of members of the order from the States of Pennsylvania, Maryland, and West Virginia, will be held at Williamsport, Cumberland county, thirteen miles south-west of Harrisburg, on the 27th, 28th, and 29th days of August. Low excursion rates will be had on all the lines from 12 to 15 cents. Each member is requested to take samples of grain and other products of the farm for exhibition.

A FRIGHTFUL ACCIDENT.

Three Men Torn to Atoms by the Premature Explosion of a Blast in a Stone Quarry.

THE GROUND SWUNG WITH THEIR LIMBS AND STRUCK OF FLESH.

The most terrible accident that has ever been our duty to record, and one which has cast a gloom over the entire community, occurred about a quarter past three o'clock, on Tuesday afternoon, in the quarry being opened for the purpose of procuring stone for the foundation walls of the new penitentiary, situated on the opposite side of the river, about one mile and a half west of this place. It was occasioned by the premature explosion of a heavy charge of powder, and three human beings were literally torn to atoms by its force.

The names of the unfortunate victims were Michael Ryan, Philadelphia, and William Keith, of Lock Haven; and Joseph Rooker, of this place, better known to many of our citizens as "the big Italian." The men were opening the quarry by what is known as "crevice blasting," and at the time of the accident were engaged in preparing a blast in a large crevice in the rocks, into which they had already worked three kegs of powder, and which was to receive three additional kegs before the powder was to be touched off. The powder already in the crevice had been firmly tamped with sand, and the men had just commenced putting in the contents of the fourth keg when the explosion occurred. The Italian was dipping the powder from the keg with a tin cup and pouring it into the fissure, Keith was sitting close beside him, and Ryan was standing by the powder, using for the purpose an iron rod, or an instrument known among quarrymen as a "sponon," and which was the cause of the explosion.

The explosion was so sudden and so powerful that it was a matter of a few moments before the distance of fifty or sixty yards, and when found were a shapeless mass. Keith's body was cut in twain, the upper portion being blown into fragments. The body of the Italian was found but a step or two from that of Keith, with the side and upper portion of the head blown away. Ryan's body was not found until four hours after the explosion, when it was discovered near the shore on the opposite side of the river, fully three hundred feet from the scene of the accident. The only part recovered was the trunk of his body, and it was a torn and shapeless mass. The lower part of his body had been blown into the air, and he was found with a foot in his left hand. One of his shoes, with a foot in it, was found at the ankle, found near where he had been standing at the time of the explosion. James Davis, of our town, who was employed at the quarry, and who was in the act of handing a keg filled with sand to the men, escaped bodily unhurt, although a heavy concussion rendered him entirely deaf.

A. P. and W. A. Wilson, of our town, drove out that road, and hitching their horse some distance away, went to the scene of the accident. The men were making. William clambered up the hillside to the quarry, and only a few seconds before the explosion occurred. He informed us that he was employed by the East Broad Top Railroad Co. to locate a line for a railroad, commencing at or near Rock Hill, and passing through the quarry, and that the iron ore fields in the neighborhood of Ft. Little.

Mr. C. O. Vandewater, of Hamilton county, Pa., visited our town last week. We were pleased to see his smiling face once more. He informed us that he was employed by the East Broad Top Railroad Co. to locate a line for a railroad, commencing at or near Rock Hill, and passing through the quarry, and that the iron ore fields in the neighborhood of Ft. Little.

Morris Woodward, the fireman on engine No. 6, who was scalded by the blowing out of a plug from the boiler of the engine, four weeks since, died on the 13th inst., from the injuries he then received. His remains were conveyed to his home in Lancaster, accompanied by a large concourse of friends, where, after religious services, they were interred in the cemetery. The deceased was aged 19 years, and son of Rev. R. S. Woodward. It is commendable to the officials and employees of the railroad for the substantial aid and unceasing attention given the deceased, through out his long and painful illness. We are informed, they spared neither means nor attention for his comfort and relief.

SHIRLEY SQUIRES.—Corn looks well, and bids fair to make a good crop. Apples will only yield a middling crop. Smaller fruits will be plenty.

The dry weather is injuring the peach crop, but there will be a large yield yet. The wheat crop is all housed, and some are threshing. The crop is an average one.

John H. Lutz threshed eighteen bushels of wheat in nine minutes with his new steam thrasher.

The oats crop will be better than was expected some time back; the straw is short but has good heads.

We are informed that a daughter of Elder John Spangole, of Hill Valley, was thrown from a buggy, a few days ago, and injured so severely that she was unable to get well. The following verdict: "That the said person on the 23rd day of July, about three o'clock in the afternoon, came to their death from a blast in the quarry near the best of what is known as the Stone Quarry, about one mile from Huntingdon, being immediately discharged by the force of a powder charge, from carelessly using iron rods and scrapers in tamping the blast instead of wooden rods and scrapers."

THE GREAT ELECTRIC LIGHT.—W. W. Cole, the well known showman, has introduced this wonderful invention to the public, and now uses it to illuminate the vast tents of his mammoth circus, and evening during the sojourn of his mammoth circus and menagerie in Huntingdon on Wednesday, August 6th. This marvelous invention bids fair to supersede all other modes of illumination and the fact that it is to be presented to the public view in a thorough and practical manner, will prove gratifying to the thousands of visitors who daily visit his great show. A thirty horse-power engine is required to furnish the electric current, and an evening chamber of effete and useless matter thrown off by the system, which is thus purified as well as invigorated by it. Its tonic influence is soon made manifest by an increase of vital energy and a more active and regular discharge of every physical function, and it has the further effect of rendering the system unassailable by material diseases. [July 11th.]

THE TRUE WAY TO INVIGORATE.—The true way to invigorate a feeble system is to induce activity into the operations of the stomach, that wondrous alchemist in which the food is transmuted into the constituents of blood, the chief element of our vitality. Hostetter's Stomachic, because it accomplishes this end, is greatly to be preferred to many so called tonics, useful indeed as appetizers, but ineffectual as aids to digestion. It is a strengthening cordial, which invigorates the stomach, healthfully stimulates the liver, bowels, and kidneys, ensuring that the system be kept in a healthy condition, and produce a luminous, luxuriant light in comparison with which all other illuminations are but gloomy and shameful shadows, while this wonderful cordial, which is a hale of light more than equal to 30,000 gas jets, and under its sun-like rays every object becomes as distinct as though it were mid-day. From this point of view, Mr. Cole promises more new and novelties than any three shows that travel. There are those mighty giants, Capt. Bates and wife, who reach the enormous height of eight feet, a troupe of six trick stallions, which have been educated to a wonderful degree of excellence, a den of ferocious performing lions, and a troupe of rare wild animals from nearly every zone on the face of the wide world, while the press throughout the land proclaims the greatness of the show. Over a million dollars are invested and all its beauties are made doubly beautiful by the great electric light. [July 11th.]

HONORED AND BLESSED.—When a board of eminent physicians and chemists announced the discovery that by combining some well known valuable remedies, the most wonderful medicine was produced, which would cure such a wide range of diseases that most all other remedies could be dispensed with, many were sceptical; but proof of its merits by actual trial has dispelled all doubt, and the great discovery has been made. W. O. HOP BITTERS, are honored and blessed by all as benefactors. [July 18-21.]

HEAT relaxes the system and opens the way for diseases to attack the debilitated and weary body. People of judgment and experience at such times make use of Kidney-Water, which has the power of purifying the whole of the body by enabling the Liver, Bowels and Kidneys to perform their functions perfectly.

A RARE CHANCE.—We have just received a large quantity of FLORIDA WATER, from the first class establishment of E. F. Kunkel, of Philadelphia, who are selling at the low price of seventy cents per bottle. It is an excellent toilet article, and sells the world over for \$1.00. Now is the time to buy cheap.

THE BEST BUTTER COLOR for dairymen's use, summer or winter, is that made by Welling, Richardson & Co., of Bangor, Me., and called "Perfect." It gives the perfected June tint, and does not injure the butter as the crude annatto and preparations made from it.

BARGAINS!—Mrs. E. M. Simons respectfully informs her customers, and the public generally, that she is closing her store, and Fancy Goods at very low prices, some of them below cost. Her stock embraces the most desirable goods, such as Ribbons, Ties, Gloves, &c. Call early for a bargain.

WANTED TO BORROW.—Two Thousand Dollars, for one year, \$25.00 worth of unincumbered Real Estate will be given as security. Inquire at this office. [July 11th.]

USE DR. VAN DYKE'S SULPHUR SOAP, FOR ALL AFFECTIONS OF THE SKIN AND SCALP; also, for the Bath, Toilet and Nursery. Sold by Druggists. [July 23-24.]

If you want to buy BOOTS and SHOES at low prices, go to the cheap store of JOS. R. CARMON. [July 23-24.]

As goods of all kinds are advancing, we have laid in a large stock, which we will sell at old prices. Now is the time to buy. [July 23-24.]

THE FINEST LINE of samples of summer goods can be had generally. Park st. No. 4021 Penn St., Huntingdon. Made up cheap for cash. Fits guaranteed. [June 6-4.]

FOUR GOOD SUGAR BARRELS for 25 cents. Now is the time to buy them. C. F. York & Co., Huntingdon, Pa. [July 25th.]

LOCAL CLIPPINGS.—From Our Paper.

published at Three Springs, we clip the following items: Prof. W. H. Hill and family, are visiting friends at Pittston.

Mr. Morgan, of Robertsville, has taken charge of the Heck ore mine. He will move his family to this place.

The Baptist have placed a bell on their church. It was presented to them by Mr. M. V. H. Esq., and manufactured at Middletown, Pa.

Samuel Brewer shipped from this place during the month of June, 220 tons of fossiliferous, and there was shipped from the Heck mine during the same month 129 tons of the same.

The bell for the M. E. church has arrived. It was bought from the Byrnes Manufacturing Co., Cincinnati, and weighs, including the mounting, 275 lbs. It is finely finished and of superior tone.

Work in the ore banks on the lands of Mr. Green has been suspended. The cause of the suspension is said to be that there is too much sand mixed with the ore. Mr. Brewer, who had charge of the mines, has moved to Berks county.

The Mineral Springs of Sallito, are becoming quite noted, judging from the number of persons that visit them. Mr. McCarthy is shipping this water to distant points, and the demand is steadily increasing. Why shouldn't Sallito be a Saratoga?

Some four weeks since, Abraham Pheasant, of Cass township, had his ankle crushed by being run over by a wagon. It was feared for some time that the limb would have to be amputated; but on our visiting Mr. Pheasant last week, we learned from him it was thought that the limb would get well.

The Sunday Schools of Sallito held a picnic on the 4th in the grove above town. Addresses were given by Messrs. S. M. Vitty, G. W. Cobill, John Drake, Jesse Smith, C. R. McCarty and S. L. Glasgow. The speaking was interspersed with appropriate music. The affair was pleasant to both the old and the young.

Mr. C. O. Vandewater, of Hamilton county, Pa., visited our town last week. We were pleased to see his smiling face once more. He informed us that he was employed by the East Broad Top Railroad Co. to locate a line for a railroad, commencing at or near Rock Hill, and passing through the quarry, and that the iron ore fields in the neighborhood of Ft. Little.

Morris Woodward, the fireman on engine No. 6, who was scalded by the blowing out of a plug from the boiler of the engine, four weeks since, died on the 13th inst., from the injuries he then received. FOUR GOOD SUGAR BARRELS for 25 cents. Now is the time to buy them. C. F. York & Co., Huntingdon, Pa. [July 25th.]

A FOOT ONCE MORE.—For ten years

my wife was confined to her bed with such a complication of ailments that no doctor could cure what was the matter or cure her, and I used a small fortune in humberg stuff. Six months ago I saw a U. S. flag with Hop Bitters on it, and I thought I would be a fool once more. I tried it, but my folly proved to be wisdom. Two bottles cured her, she is now as well and strong as any girl's wife, and it cost me but two dollars. Such fairy pills.—H. W. Detroit, Mich. [July 18-21.]

The celebrated HEALING SHIRT for sale at Parker's, 4021 Penn St. Guaranteed to fit. Justices to all. One price only, at the Saving Store, 511 Penn Street. Goods received daily. may-3m.

Chew Jackson's Best Sweet Navy Tobacco Nov. 15-17.

A CARD. To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c. I will send a receipt that will cure you, for \$2.00. Such a receipt has been sent to thousands of men. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the Rev. JOSEPH T. LEXAN, who lives in New York City. Feb. 14, 79-17.

HUNTINGDON MARKETS. Corrected Weekly by Henry & Co.

WHEATMARK PRICES. HUNTINGDON, PA., July 21, 1879.
