

don't sow it so deep. The great, heavy harrows of ten or twenty years ago are not now employed by them in covering asked the thoughtful Wesley. seed, and the drill, which can be depended on better, is becoming universally popular. In broadcast sowing, after the ground is thoroughly prepared, the Thomas smoothing harrow will cover the seed deep enough. A Wisconsin writer gives the result of an experiment in planting at different depths, on the surface, one-fourth inch, one-half inch, threenation fourth inch, and so on to several inches. That on the surface lay two weeks before sprouting; that one fourth to 3 inches heaven. Improving his opportunity, he deep came up in four or five days; and so again inquired : on, getting later as the depth increased. The last to come up was planted three and a half inches deep, and was fourteen days in reaching the surface. None planted deeper ever reached the surface. At the end of six weeks that planted one fourth to one-half inch deep stood way ahead of the rest .- Record and Farmer.

## Eat Onions.

Few people dream of the many virtues of onions, and those few are enthusiastic for the beneficent bulb, and believe it a panacea for every ill. Lung and liver complaints are certainly benefitted, often abiding place. It cannot be that our life cured, by a free consumption of onions is a bubble, cast off by the ocean of eternieither cooked or raw. Colds yield to them ty to float a moment upon its waves and like magic. Don't be afraid of them- then sink into darkness and nothingness. especially if you are married. Taken at Else why is it that the high and glorious night all offense will be wanting by morn. aspirations which leap like angels from the ing, and the good effects will amply com- temple of our hearts are ever wandering pensate for the trifling annoyance. Taken abroad unsatisfied? Why is it that the regularly they greatly promote the health rainbow and the cloud come over us with a of the lungs and the digestive organs. An beauty that is not of earth, and then pass extract made by boiling down the juice of off and leave us to muse upon their faded onions to a syrup, and taken as a medicine, lovliness? Why is that stars, which hold answers the purpose very well, but fried, their festivals around the midnight throne. roasted or boiled onions are better. are set above the grasp of our limited Onions are a very cheap medicine, within | faculties-forever mocking us with their everybody's reach, and they are not by unapproachable glory? And why is it that any means as "bad to take" as the costly bright forms of human beauty are prenostrums a neglect of their use will neces- sented to our view and then taken from us, sitate.

folly to keep old sheep. They should be upon our hearts? We are born for a turned off to the butcher while they are in their prime. It does not take helf on in their prime. It does not take half so fades, where the stars will be spread out much to fatten them then. When they before us like islands that slumber on the structure must be rebuilt. Four sets of which here pass before us like visions will lambs are all a ewe can bear; this will stay in our presence forever. - Whittier. bring her to five years, and this is an age when, with little extra care, she will round God says that "all things shall work up to fine carcass. Exceptions may be together for good to them that love Him," made when the breed is scarce, and the and our experience has repeatedly illusblood is more valuable than anything else." | trated the statement. It may not appear

CONCRETE for foundations is formed of five parts of gravel and sand to one part of fresh burned lime, ground to powder without slaking and measured dry. Well turn and shovel together, with sufficient water to slack the lime into the state of very thick mortar. Chips and small pieces of stone may be added with advan-
