Almost all forest trees are straight and comparatively slender; here the trunks are more buried in foliage and the upper branches are a hundred, perhaps a hundred and fifty feet from the ground. Some form fluted columns of buttresses around the roots; a few are spiny. In the foliage we only notice the curious effect produced by the preponderance of pinnate leaves, as in the acacias and myrtles. Pedestrians who saw three well dressed children put their arms around that strange old woman's neck and kiss her were greatly puzzled. They didn't know the hearts of children, and they didn't hear the woman's words as she rose to go:
