

The happiest men who are full
Are those who have their soil
Commercial Fertilizers.

To apply or not to apply commercial fertilizers is one of the most important questions of the day among farmers of our older States who appreciate the necessity of immediate action in the restoration of their lands, and who cannot command farm yard manure in sufficient quantity to accomplish this. In many portions of the South, especially east of the Mississippi valley, and in the Eastern States, artificial manures have been experimented with to a considerable extent. Reports from equally trustworthy sources are widely diverse as to results. One who has tried Peruvian guano, for instance, failed to receive any benefit therefrom and naturally condemned it; another doubles his crop with its assistance and therefore extols it. Thus opinions vary all the way through the list. The difference of opinion is due sometimes to the adulteration of the materials employed, but largely to drawing conclusions without considering all sides of the subject, and simply proves the imperative necessity of exercising common sense, both in the selection and application of the fertilizers. To start with, the difference in soils should be remembered. Lands vary widely in their capacity for supplying crops with food, and consequently, in their demand for fertilizers. Some soils will bring good results for some fertilizers given them; others unless previously prepared by tillage, drainage, irrigation, &c., will not. The only correct way to ascertain what a soil wants, and then supply it. The provident farmer, when he is in doubt in this matter, cultivates the bulk of his crops under the most approved of old methods, testing in a small way as many new practices as possible until such a time as he feels confident he has found what suits his special requirements. The results of the experience of those who have gone over the same ground in advance is not only of interest but judiciously considered and applied, may be of great benefit to a novice in the use of commercial fertilizers. The American farmer gains a hint, at least, toward the right direction when he learns that by far the largest quantity of all manufactured manures in England is applied for root crops. There are many districts where turnips and seeds are grown with no other manure than mineral superphosphate, at the rate of three to four hundred weight per acre. On cold, clay soils, in a fair agricultural condition, according to Dr. Voelcker, three hundred weight of a mineral superphosphate containing an average twenty one to twenty five per cent. of soluble phosphate will produce at least as heavy a crop of seeds and turnips as a manure containing in addition to soluble phosphate of lime, ammonia or nitrogenous matter. On light land, however, says the same authority, the use of purely phosphatic manure cannot be relied upon for producing a good crop of roots. On such land artificial manures are seldom used alone, but generally in conjunction with a dressing of barnyard manure. Dissolved bones, Peruvian guano, compound artificial manures containing from two to three per cent. of ammonia are preferred to mineral superphosphate as a manure for root crops on high land and on heavy soils out of condition, by English cultivators. Nitrate of soda has been used of late years in England with considerable advantage in addition to dissolved bones, or a mixture of superphosphate and some salt as a mixture for mangolds.

Curing Sick Chickens and Preventing Disease.
A writer in the *Practical Farmer*, in the course of a lengthy article, says: After we had lost nearly every chicken of the farm, and tried all the remedies we could hear of, some one sent word from some distance, to try crotches. Of course it was done, and the result, not another chicken sickened.
For a while I put as much as three table-spoonsful in a quart of meal, mixed with hot water, and gave it to a dozen fowls every day; then so much, and only once or twice a week; then once in a week or two weeks, and I never saw a sick or droopy chicken while I did so. But after a time I neglected it, and the result was, in time the chickens commenced dropping off again, but stopped as soon as I recommenced giving the powders. This was repeated a number of times, but in the last three years I not seen a symptom of the kind. I still keep a paper of powder on hand, and once in a while, when I think of it, I give them a dose.

Mr. E. P. BEEBE recently explained to the members of the Union County (N. J.) Farmers' Club his plan for renovating an old orchard, and making it more productive. He first sees to it that the trees are liberally fed. "Then," he said, "in the spring of the year I scrape off all the rough bark with a spade, and wash with a solution of a pound of potash with four gallons of water, applying with a broom; remove the old limbs, a portion at a time, and supply their place with young, healthy wood, and in two years I have a fine, healthy-looking tree, with healthy fruit. When large limbs are removed, cut them with a slant, so that the water will not remain to make the wood rot, and wax, oil or paint them over till the wound is covered with new bark. Trees should not be pruned later in the season than when in blossom."

FRENCH TOAST.—Beat your eggs very light, and stir with one pint of milk; slice some nice white bread, dip pieces into the egg and milk, lay them into a pan of hot butter and fry brown. Sprinkle a little powdered sugar and cinnamon or nutmeg on each piece, and serve hot.

COOPER & CONARD, DRY GOODS PHILADELPHIA.

BARAINS IN EVERY DEPARTMENT

In order to properly display the immense stock of goods we will have the pleasure to exhibit the coming Autumn, we have secured an additional store adjoining the three occupied by us, making four large buildings, which will be thrown into one Great Dry Goods Mart.

BARAINS IN EVERY DEPARTMENT

Before making the needed alterations in this enlargement, we will sell a large portion of our present stock by making such reductions in prices from time to time as will make it the interest of every buyer to personally see the inducements we are offering, or write us for what you may want.—Our Mail Department promptly attends according to all communications addressed to us.

BARAINS IN EVERY DEPARTMENT

Many Special Bargains will be shown in every department, in addition to the full regular stock always shown by our house. We have Black and Colored Silks, Satins in Blacks and Colors, Velvets, Brocades, and many elegant materials now so much used in combining and trimming.

BARAINS IN EVERY DEPARTMENT

In Dress Goods are the Plain and Figured Materials made by the French and English, also all the desirable American fabrics, the prices of which run from \$2 to \$125, many of which have been marked away down. In Silks, too, we have some rare bargains.

THE NEW VICTOR. SIMPLICITY SIMPLIFIED!

Improvements September, 1878.
Notwithstanding the VICTOR has long been the peer of any Sewing Machine in the market—a fact supported by a host of volunteer witnesses—we no longer have a confident claim for its greater simplicity, a wonderful reduction of friction and a rare combination of desirable qualities. Its shuttles are a beautiful specimen of mechanism, and take rank with the highest achievements of inventive genius. Note.—We do not lose or consign Machinery, therefore, have no old ones to patch up and re-varnish for our customers.

We Sell New Machines Every Time.
Send for Illustrated Circular and prices. Liberal terms to the trade. Don't buy until you have seen this.
Most Elegant, Simple and Easy Running Machine in the Market.—The Ever Reliable VICTOR.

VICTOR SEWING MACHINE COMPANY,
MIDDLETOWN, CONN.
S. S. SMITH & SON, Agents, HUNTINGDON, Pa.

Now I Lay Me Down to Sleep.

"Now I lay me down to sleep,
I pray the Lord my soul to keep,
If I should be before I wake,
I pray the Lord my soul to take."

Who are you, man or woman, for whom this prayer has not old and sweet associations, who, hearing its words, hear not, too, the "memory bells" ringing up from the golden plains of your childhood, and feel not the soft gales from the morning land of poor life sweeping over your soul?

You may be a man now in the pride and strength of your years; you may have carved out for yourself an honorable name and destiny in this world—mayhap you are the owner of broad lands, and proud homes, and your heart has grown hard in its battle with the world.

But stop a moment, and listen to this little verse, so simple that the merest babe who learns to lip the words can comprehend them, and so grand in its sublime significance and faith, that the wisest shall only have learned the true lesson of life when the soul utters them as it did in its infancy.

Let us see! How many years ago was it? twenty, thirty; no matter, at the old sound of "Now I lay me," they have rolled their massive doors, and you go down through them to the old, one-story house, where your life first took its morning. You see its little window on its right side, close under the rafters; all you slept a sound slumber, and dreamed sweeter dreams in that old garret than you ever did in your lofty chambers; with the gilded ceilings and snowy draperies, and what matter if your bed was a straw one, and your coverlet made of red and yellow "patches" of calico, you never snuggled down so contentedly under your spring mattresses and Marseilles counterpanes.

"Now I lay me," how softly sleep would come and weigh down your eyelids, as you repeated the words after her; ah; you can hear her very tones now stealing across your heart, though it is so many years since death silenced them; you feel the soft touch of her hand on your pillow, and the tender lingering of her kiss upon your lips—you break down here, proud man as you are—the memory of your mother is more than you can bear. If she had only lived, you would not have been what you now are; but, thanks be to God, she left you something that can never grow old and dim, not even in the "unspeaking brightnes," beyond the shining gates—the memory of a loving, praying, Christian mother.

Reader, if may be that in the din and struggle of life you may have forgotten to pray at all, and that night after night you have laid down on your pillow, never thinking of the shining ranks of angels that God's mercy stationed around, or thanking Him for the day or the night.

But come back, we beseech you, to the old prayer of your childhood. You can not have outgrown that—no matter if your hair is frosted with the snows of life's December, and if your years are three score and ten, kneel down by your bedside, and utter these words, see if something of its dew and blessing fall not upon your slumber.

And remember that sooner or later, you must "lie down and sleep," when this prayer will be all your soul can take—all that will avail of your rank, or wealth, or fame, whatsoever your prize in this world, which is but the shadow of eternity. Ah! we shall soon pass the "Green threshold of our common graves," but the little prayer, the first, it may be, that we took upon our childish lips, as we sat out under the solemn arches of the "River of Death," follows us, a sweet, faint, tender air, from the shores, and when we shall cast anchor,

"The Lord our soul shall take."

Advice to Consumptives.
No man, however uncleanly, would drink muddy, dirty water. A party which occupies a room for hours, breathing the same air, might be compared to a party of bathers drinking the water in which they bathe. The patient must keep the windows of his bedroom open. Night air is fresh air without daylight. In close, crowded rooms, the patient suffering from lung complaints breathes compulsively.

By taking these precautions and using Dr. Pierce's Golden Medical Discovery and Pleasant Purgative Pellets, fully one-half of the cases of lung complaints would be cured in six months. For cough and irritation of the lungs do not always indicate the presence of consumption although it may result in that disease, and if consumption has already become deeply seated in the system, this is the most efficient course of treatment that can be pursued outside of any institution that provides special facilities for the treatment of this disease. Dr. Pierce's celebrated Invalids' Hotel is such an institution. Send stamp for descriptive pamphlet containing also a complete treatise upon consumption, explaining its causes, nature, and the best methods of treating it, together with valuable hints concerning diet, clothing, exercise, etc., for consumptives. Address World's Dispensary Medical Association, Buffalo, N. Y.

Oh! ye whose paths are in the pleasant places! whose faith never tried by heav'n's seeming disregard of your prayers and tears! who never knew the lack of tender home-love and protection, exult in your happiness and thank Providence. But while you drink from your cup of life such honey-sweet draughts, give a thought now and then to those daily potatoes savor so strongly of worm-wood, and remember that a kindly word and helping hand, which cost little, may make light or burdens of some one now almost discarded.

TRIALS are moral ballast that often prevent our capsize. When we have much to carry, heaven rarely fails to fit the back to the burden; when we have nothing to bear we can seldom bear ourselves. The burdened vessel may be low in rearing the destined port, but the vessel without ballast is in imminent danger of not reaching it at all.

In every place your Father's eye is upon you.

Crosses are ladders that lead to heaven.

SIMMONS' REGULATOR
