The general public is warned against the racial who calls at the homes of charitably inclined persons, and represents that a little child of his just died, and that he is in such destitute circumstances as to prevent him from buying a coffin—his well concocted tale is so well acted, and he is enough to bring tears from the eyes of a brass monkey. Steer clear of him!

An information was made against him here, and a warrant was issued for his arrest, but James, the officer, did not take it. It was supposed by the officer that Snowden was traveling, so he came on and secured the assistance of Chief Hiram in the search. A new enemy of the potato is now on the march through the State. This foe to the potato is believed to be more dangerous than the Colorado beetle. It is a small worm, resembling a small inch long, and is very active. It is very common in length. It deposits its eggs, which are of a yellowish shade, on the leaves of the potato plant and they are hatched in a few hours, when the brood at once covers the sprout, twenty-four hours sufficing to destroy it. No bug, not even the Colorado beetle, has ever been known to eat the sprout so soon as it is full grown, and when touched falls to the ground as if dead until all danger is over, when it turns out its feet and wings, and disappears into the earth at the root of the nearest vine. The appearance of this bug has been very destructive. It is believed that when it enters the ground it attacks the potato.

The Philadelphia Journal says, a few days ago, a mother, residing in this place, left her house for a ride of several small children, to go for berries. When she returned, she found a key at her door, and four young ones, was found at the kitchen stove having lighted the fire with coal oil, the smell of which attracted a neighbor who came very opportunely to see the coal oil lamp, with some oil in the same, standing on the rapidly warming stove. The mother, on seeing the fire, immediately extinguished it, and the children were all safely home.

Some children have been seen in this town can profit by the above by reading it carefully, and then pasting it on the face of their mirror, where they can see it every time they make preparations to leave the house, leaving their children in charge. Such culpable negligence ought to be punishable.
