

THERE ARE SOMETIMES CIRCUMSTANCES WHICH NOT ONLY PALLIATE BUT JUSTIFY [DUELING.]—Reader, what think you?—Can you believe that in this moral and religious community, there are individuals so lost to all sense of the obligations imposed upon them by the laws of God and man, as to publish such a sentiment to the world?—What, to take away the life of a fellow man in cold blood; in other words to commit foul and unnatural murder merely to gratify a hellish and fiend-like disposition!—If such sentiments are inculcated by the press, 'tis time that the sober and reflecting portion of the public should see to it, and prevent the spread of such pernicious and destructive doctrines. But, that our readers may not suppose we are contending with imaginary evils, we refer them to the Carlisle Herald of the 10th inst. where they will perceive a bold and undisguised attempt to screen the notorious blackguard, HENRY A. WISE, one of the murderers of the lamented CILLEY, from merited odium and disgrace, from which we have selected the sentiment which heads this article. We are the more astonished at the position assumed by the Herald, from the fact that the nominal editor and principal controllers of that sheet are (professionally) members of the Church, and, consequently, bound by the solemn covenant they entered into at the time of their admission, to take the Holy Scriptures as their rule of faith and practice—a book which no where, so far as we are acquainted with its contents, justifies duelling under any circumstances. The prime mover in the bloody scene which resulted in the death of an amiable & talented man, who, in an unguarded moment, accepted a challenge, and brought deep and indelible disgrace upon the Congress of the United States, may be a man of talents and "great physical courage"; for aught we know to the contrary; but that he is possessed of "moral courage," as the Herald would make its readers believe, we most unhesitatingly deny. True moral courage is not to be found in a professed duellist, no more than genuine piety in those who advocate and encourage the barbarous practice of duelling—and it ill becomes a party, professing to be in possession of "all the decency and all the respectability" of the country, to permit its organ to advocate a cause which is a disgrace to the age, and should be frowned down by every well wisher of the country.

As to Henry A. Wise, who appears in the eyes of the editor of the Herald, to be the beau ideal of excellence, we have scarcely a word to say. His character, morally and politically, is sunk so low in degradation and infamy, that no effort of ours can fasten any odium upon him which does not already attach to his name. Accursed of God and man, he has the foul mark of murder branded on his forehead; "a fugitive and a vagabond upon the face of the earth," he is unfit society for any but the most abandoned of all God's creation—and if he had his due, he would ere this have been elevated to a post of honor, a spectacle to Heaven and earth. If the editor of the Herald can find any thing to admire in such a man, we have no objection; but we do most solemnly protest against his wicked attempt to hold the murderer up as an exemplar to the community at large, and particularly to the young and rising generation.

NEW YORK ELECTION.—The official returns show that VARIAN'S maj. for Mayor is 1067. The democrats carried 24 out of 34 common Council. The whole number of votes polled was 41,113—nearly 2000 more than were ever before given in that city.

RHODE ISLAND ELECTION.—At the recent election in this State no choice was effected for Governor and six or seven members of the Senate—none of the candidates having a majority of all the votes given. The democrats have gained six representatives, and probably elected the State Treasurer. The following is the reported vote for Governor: Sprague (Federal) 2554 Burges (do) 430 Bullock (democrat) 2375 At the next trial for Governor, &c. a plurality elects agreeably to the constitution of that State.

FRANCE AND MEXICO.—The treaty concluded on the 9th of March, between Admiral Baudin and the Mexican authorities, has been ratified by the French government.

The Report of the School Directors of the Borough on the state of the finances, &c., and the sum necessary to be raised for school purposes the ensuing year, was handed in too late for publication this week. It shall appear in our next.

Accident at the Inclined Plane.—We learn that the rope at the Inclined Plane on the Columbia Railroad, broke about 7 o'clock yesterday morning, just after the passenger cars had passed. Four burthen cars, loaded with flour were attached at the time, and rushed down from near the top of the plane with tremendous velocity. The cars were of course destroyed, as well others which arrested their progress and were standing at the foot of the plane. The West Chester stage, full of passengers, was on the bridge at the time, and had not the rapid career of

the cars met with an impediment, the destruction of life would probably have been very great; but luckily no personal injuries were sustained. The new rope ordered by the superintendent of Motive Power, has not yet been received from the manufacturers, but is daily expected.

HOWD'S IMPROVED DIRECT ACTION WATER WHEEL.  
THE public are informed that the subscriber has bought the right of the above water wheel, for the State of Pennsylvania. It is considered by those having them in use, as one of the most important improvements that has ever been introduced. Persons desirous of seeing the wheel, can do so, by calling at the foundry of DAVID COCKLEY, Lancaster. The annexed certificates have been given as a slight testimonial of its value; they will speak for themselves. All communications addressed to the subscriber in Lancaster, Pa., will be promptly attended to.  
MICHAEL M'MATH.  
April 11, 1839.

This is to certify, that I have put in one of Howd's Patent Cast Iron Direct Action Water Wheels, in the place of a Reaction Wheel, that the Direct Wheel does not flood the tail race as much by three inches as the reaction did, and that I can grind seven bushels with the direct action wheel an hour, and drive two run of stones, where I could not grind four bushels in the same time with the reaction and drive one run of stones.  
PETER FAHNESTOCK.  
Ephrata tp. Lan. co. Oct. 1838.

This may certify, that I have been engaged in putting in S. B. Howd's cast iron direct action Water Wheel, both in the State of New York and in Michigan, and can give it as my decided opinion that with 8 feet head or under, rightly put in, it will do more business with the same water than any other water wheel which I have yet had any experience in, and in reference to back water, is second best to none that I have yet tried. In reference to guarding against ice; there can be no better operation, and it is very easy to be kept in repair.  
STEPHEN AILES, Millwright.  
Alloway, September 3, 1838.

This may certify, that I have had in my Mill one of Mr. Howd's cast iron direct action Water Wheels, and in the same place I have also had a Reaction Wheel, yet I think Mr. Howd's will do more business with less water than any other I have tried. It does well in back water. I have had from 5 to 6 feet head. I think we could do as much work with half the water as we used to do with the under shoot wheel, which has also been in operation in my mill.  
LAWRENCE RILEY.  
Lyons, September 3, 1838.

This may certify, that we have used one of S. B. Howd's patent water wheels since December last, by the side of a reaction wheel, and we think that Howd's will do double the business; with the same water that the reaction wheel will do or very near. We never have but three feet head, and can grind with that eight bushels per hour. We are subject to back-water. This wheel will do as good business under back water as the reaction wheel, and we recommend it to the attention and patronage of the public.  
SIMON BURTT,  
MILES S. LEACH.
