OF GERMANY.

THE GREATEST OF HUMAN BENEFACTORS.

Citizens of North and South America,
To Louis Offon Goelicke, M. D. of Germany, Europe, belongs the imperishable honor of adding a new and precious doctrine which, though vehemently opposed by many of the faculty, (of which he is a valuable member) he proves to be as well founded in truth as any doctrine of Holy Writ—a doctrine, upon the vertty of which are suspended the lives of millions of our race, and which he boldly challenges, his opposers to refute. viz: Consumption is a disease always occasioned by a disordered state of Vis Vita, (or Life Principle) of the human body: often secretly lurking in the system for years before there is the least complaint of the lungs—and which may be as certainly, though not so quickly cured, as a common cold, or simple headache. Citizens of North and South America, which may be as certainly, though not so quickly cured, as a common cold, or simple headache.—An invalually precious doctrine this, as it imparts an important lesson to the apparently healthy of both sexes, teaching them that this insidious foe may be an unobserved inmate of their "clayey houses" even while they imagine themselves secure from its attacks, teaching them that THE GREAT SECRET IN THE ART OF PRESERVING HEALTH IS TO PLUCK OUT THE DISEASE WHILE IN THE—BLADE, AND NOT WAIT TILL THE FULL GROWN EAR.

This illustrious benefactor of man is also entitled to your unfeigned gratitude, and the gratitude of a world, for the invention of his Matchless Sanative,—whose healing fiat may justly claim for it such a title, since it has so signally triumphed over our great common enemy consumption, both in the first and last stages,—a medicine which has thoroughly filled the vacuum in the Materia Medica, and thereby proved itself the Conqueror of Physicians—a nedicine which all mankind will have abundant cause to bless the benificent hand of a kind Providence—a medicine whose wondrous virtues have been so glowingly portrayed even by some of our clergy, in their pastoral visits to the sick chamber; by which means they often become the hapber; by which means they often become the hap-py instruments of changing despondency into hope, sickness into health, and sadness of friends
