ciently large to contain half a gill of oil, with a tight cover to keep the contents perfectly clean, which furnishes each pivot with an ample supply of oil at all times, so that after the machine has been used a day or two eight hundred or a thou-sand sheaves may be thrashed without stopping or injuring any part of the machine. The unders signed has frequently seen more metal worn off in thrashing two hundred sheaves for want of oil in than would have thrashed several large crops with proper care and attention. During the past year upwards of fifty of the above machines have been sold in this and Union county, sever-al of which have been thrashing almost constant-by during the thrashing season, and as a 'test of 2 have been sold in this and Union County, sever-al of which have been thrashing almost constant-by during the thrashing season, and as a test of their superior claims to durability, the cost for repairs for the while number has not exceeded fifteen dollars. Notwithstanding there have been, comparatively speaking, no repiars need-ed, yet the undersigned, so far from following the customary rule of taking less care to have them well built when once introduced, has made several important additions calculated the add materially to the strength and durability of the same, but that none may be under the necessity of placing implicit confidence in the above state-ment without further evidence, the undersigned would refer them to the following persons.who have bought machines of him, viz: R.
