THE YANKEES BEATEN!

THE undersigned challenges the U. States to produce the equal of his

PORTABLE HORSE POWER.

For beauty, stability, lightness and economy, are combined to a greater extent than in any other hitherto invented. The motion is regulated to the natural walk of the horses, and will give the machine its proper motion with a pulley on the cylinder shaft eight inches in diameter. It is of vast importance to prevent the band from slipping, and is a good guide for a farmer to tell how much motion a power has. As there are some persons continually talking of their improvements, a man with half an eye, by taking notice of the pulley can tell at a glance which is the best. Among numerous other advantages which the above machine possesses over all others now in use are the fixtures for greasing every part subject to friction, every pivot having a cup sufficiently large to contain half a gill of oil, with a tight cover to keep the oil from getting out, and which furnishes each pivot with an ample supply of oil at all times, so that after the machine has been used a day or two eight hundred or a thousand sheaves may be thrashed without stopping or injuring any part of the machine. The undersigned has been thrashing more than 2000 sheaves of wheat in thrashing two hundred sheaves for wait of oil than would have thrashed several large crops with proper care and attention. During the past year upwards of fifty of the above machines have been sold in Union county, several of which have been thrashing almost constantly during the thrashing season, and as a test of their superior claims to durability, the cost for repairs for the whole number has not exceeded fifteen dollars. Notwithstanding there have been, comparatively speaking, no repairs needed, the undersigned, so far from following the customary rule of taking less care to have them well built when once introduced, has made several important additions calculated to add materially to the strength and durability of the same, but that none may be under the necessity of placing implicit confidence in the above statement without further evidence, the undersigned would refer them to the following persons who have bought machines of him, viz: R. R. D. Woods, Esq., Capt. S. Woods, Valuation on Wm. Kerr, John P. Nathan Woods, Judge Stuart, John M'Geehan, A. W. Stewart, E. Sterrett, S. Woods, Jr., S. Woods & H. Smith. Any persons wishing to purchase or see the above machines are invited to call at the shop of the undersigned in West Pottersfield, Carlisle.

Goeliche's Matchless Sanative.

The article published below concerning the new and popular doctrine advanced by the illustrious Goeliche of Germany, cannot fail of exciting a deep and thrilling interest throughout the country.

[Translated from the German.]

LOUIS OFFON GOELICHE,

OF GERMANY.

THE GREATEST OF HUMAN BENEFITORS.

Citizens of North and South America.

To LOUIS OFFON GOELICHE, M. D., of Germany, Europe, belongs the imperishable honor of adding a new and precious doctrine to the Science of Medicine—a new doctrine which, though vehemently opposed by many of the faculty, (of which he is a valuable member) improves to be as well founded in truth as any doctrine of the old school, and upon the verity of which are suspended the lives of millions of our race, and which he boldly challenges his opposers to refute. viz: Consumption is a disease always occasioned by a disordered state of the Vitas Cor, or the Vitas of the human body, which is the cause of the system for years before there is the least complaint of the lungs—and which may be as certainly, though not so quickly cured, as a common cold, or simple headache.

An invaluable precious doctrine, this is it, it is the Vitas Cor, or the Vitas of the human body, which is the cause of the system for years before there is the least complaint of the lungs—and which may be as certainly, though not so quickly cured, as a common cold, or simple headache.

BOW'S IMPROVED DIRECT ACTION WATER WHEEL.

THE public are informed that the above water wheel, for the State of Pennsylvania. It is considered by those having them in use, as one of the most important improvements that has ever been introduced. Persons desirous of seeing the wheel, can do so by calling at the foundry of DAVID COCKLEY, Lancaster. The annexed certificates have been given as a slight testimonial of its value; they will speak for themselves. All communications addressed to the subscriber in Lancaster, Pa., will be promptly attended to.

April 11, 1839.

[Copy.]

This is to certify, that I have put in one of Bow's Patent Cast Iron Direct Action Water Wheels, in the place of a Reaction Wheel; that the Direct Wheel does not flood the tail race as much by three inches as the reaction did, and that I can grind seven bushels with the direct wheel, where I could not grind four bushels in the same time with the reaction and drive one run of stones.

PETER FAINESTOCK.
Ephrata pa. Lan. co. Oct. 1839.

Alloway, May 5, 1839.

This may certify, that I have been engaged in putting in S. B. Bow's cast iron direct action Water Wheel, both in the State of New York and in Michigan, and can give it as my decided opinion that with 8 feet head or under, rightly put in, it will do more business with the same water than any other water wheel which I have yet had any experience in and in reference to back water, which is a great evil, I think I have never had a better operation, and it is very easy to be kept in repair.

STEPHEN AILES, Millwright.

Alloway, September 3, 1839.

This may certify, that I have had in my Mill one of Mr. Bow's direct water wheels for the space of one year. It is a five feet wheel, and I have had a reaction in the same place—I have also had Wheeler's Union Wheel, yet I think Mr. Bow's will do more business with less water than any other I have tried. It does well in back water. I have had from 5 to 6 feet head. I think we could do as much work with half the water as we used to do with the reaction wheel, which has been in operation in my mill.

LAWRENCE RILEY.

Leons, September 3, 1839.

This may certify, that we have used one of S. B. Bow's patent water wheels for the space of one year, by the side of a reaction wheel, and we think that Bow's will do double the business, with the same water that the reaction wheel will do our year. We never have but three feet head, and can grind with that eight bushels per hour. We are subject to back water. This wheel will do as good business under back water as the reaction, and we recommend it to the attention and patronage of the public.

CHANGE OF AGENTS

FOR THE Universal Medicine.

ORATIO SHEPHERD MOAT, late Sole Agent in the United States, having been dismissed by the British College of Health, Dr. George Taylor now of the city of New York, has been appointed Sole General Agent and High Dispensing Doctor for the State of Pennsylvania.

The said George Taylor has appointed A. D. Olmstead, of Monroe, Susquehanna county, Pennsylvania, Sole General Agent for the states of Maryland and Delaware, and thirty three counties east of the Allegheny Mountains, Pennsylvania, and George C. Hand, Surgeon Dentist, of Allentown, Lehigh county, Pa., General Agent for four counties in the state of New York, and seven in the state of New Jersey, to wit—Burlington, Cape May, Cumberland, Gloucester, Monmouth and Salem, in the state of New Jersey; Genesee, Livingston, Monroe and Steuben, in the state of New York.

Hereafter, no person can or will vend the genuine Universal Medicine within the said districts, except by the authority of the said A. D. Olmstead and George C. Hand. All former agencies within said districts having terminated by the removal of H. S. Moat, who
