PORTABLE HORSE POWER, for beauty, stability, lightness and economy are combined to a greater extent than in any other hitherto invented. The motion is regulated to the natural walk of the horses, and will give the machine its proper motion with a pully on the cylinder shaft eight inches in diameter, which is of vast importance to prevent the hand from cylinder shaft eight inches in diameter, which is of vast importance to prevent the band from slipping, and is a good guide for a farmer to tell how much motion a power has. As there are some persons continually talking of their improvements, a man with half an eye, by taking notice of the pully can tell that it is all a hoax.

Among numerous other advantages which the above machine possessus over all others now in the are the fixtures for greating every pair subuse are the fixtures for greasing every part sub-ect to friction, every pivot, having a cup suffi-ciently large to contain half a gill of oil, with a tight cover to keep the contents perfectly clean, which furnishes each pivot with an ample supply of oil at all times, so that after the machine has been used a day or two eight hundred or a thou-sand sheaves may be thrashed without stopping sand sheaves may be thrashed without stopping or injuring any part of the machine. The undersigned has frequently seen more metal worn off in thrashing two hundred sheaves for want of oil than would have thrashed several large crops with proper care and attention. During the past year upwards of fifty of the above machines have been sold in this and Union county, several of which have been through the country. have been soldlin this and Umon county, several of which have been thrashing almost constantly during the thrashing season, and as a test of their superior claims to durability, the cost for repairs for the whole number, has not exceeded fifteen dollars. Notwithstanding there have been, comparatively speaking, no repiars needed, yet the undersigned, so far from following the customary-rule of taking less care to have them well built when once introduced, has made several important additions calculated to add materially to the strength and durability of the same, but that none may be under the necessity of placing implicit confidence in the above statement without further evidence, the undersigned ment without further evidence, the undersigned-would refer them to the following persons who have bought machines of him, viz: R. Sir:—Being on a visit to Philadelphia, from my agtive village of Germantown, I joyfully avail myself of the opportunity of adding a few words of recommendation to your celebrated Pilis, to the abundant testimony already given in their favor. in their favor. About four years ago, I was at-tacked with Dyspepsia, and for several years suffered from that complaint in its worstetages. suffered from that complaint in its worsteinges. Notwithstanding I tried every thing that came before the public, I obtained no relief, till I accidentally saw your advertisement. From the numerous and respectable testimonials which accompanied it, I had some faint hopes that your medicine might not prove altogether uscless in my own case. I tried it, and it is scarcely necessary to add was shortly cured. Indeed the success was greater than I could possibly have anticipated from even the warmest recommendations. As a small return for the benefit you dations. As a small return for the benefit you have bestowed, I send you this acknowledgment of my thanks and the deep sense of obligation under which I feel myself toward you. Having implicit confidence in the efficacy of your Camomile Pills, and feeling it due to my fellow sufferers, I would warmly entreat all who may be dragging on their existence under the influence of that scourge of the human family, Dyspepsia, to lay aside their early prejudices against such remedies, and apply to you, that they may receive a speedy and permanent restoration.

I still reside in Germantown, though I frequently visit the city, and will willingly give any further information that may be desired.
