JACOB GROSS, Adm'r. November 7, 1839.

R. SWAYNE: Respected Friend:—From the very beneficial effects which I have received from the use of thy Compound Syrup of Wild Cherry Bark, I am fully willing to testify to the astonishing effect. My attack was that of a common cold, which began to threather the stress of the stres that of a common cold, which began to threaten something of a more serious nature. Being recommended to use the above Syrup, I finally gave it a trial, and am happy to say it gave me almost instant relief. I have used it frequently, and always with the same beneficial effects. If others would use this medicine at the commence ment of their colds and coughs, they would prevent a disease which would be more alarming it its character, and much more obstinate in the cure.

Ephrata tp. Lan. co. Oct. 1838. Alloway, May 5, 1838. This may certify, that I have been engaged in putting in S. B. Howel's cast iron direct action Water Who L-both in the State of New York and in Michigan, and can give it as my decided opinion that with 8 feet head or under, rightly put in, it will do more business with the ame water than any other water wheel which

Alloway, September 3, 1838.
This may certify that I have had in my Mill one of Mr. Howd's direct water wheels for the space of one year. It is a five feet wheel, and I have had a reaction in the same place—I have also had Wheeley's Union Wheel, yet I think Ar. Howd's will do more business with less water than any other I have had from \$6 for head. I think we could do as much wirk with half the water as we used to do with the under shoot wheel, which has also been in operation in my mill. LAWRENCE RILEY.

Lyons, Sept. mber 3, 1838.

This may certify, that we have used one of S. Howd's patent water Wheels since December last, by the side of a re-action wheel, and we think that Howd's will do double the business, with the saine water that the reaction which will door very near. We never have but three refet head, and can grind with that eight bushels per hour. We are subject to back water. This wheel will do as good business under back water as the re-action, and we recommend it to the attention and patrenge of the public.
