Dyspepsia, or Indigestion, Effectually Cured.

Mr. Wm. Tucker, having lately been restored to a sound state of health, through the efficacy of Dr. Hunt's Botanic Pills, thinks it an indispensable duty to state certain facts relative to the disease under which he had so long suffered. The symptoms were a painful obstruction, with a constant rejection of food, head-ache, palpitation of the heart, lowness of spirits, a troublesome dry cough, dizziness, tightness at the chest and difficulty of breathing, almost constant pain in the side, loins, and shoulders, accompanied with much languor and debility. These afflictions, together with an unusual degree of flatulence, brought on such a state of extreme weakness, as to prevent him from attending to his business, and his health appeared lost beyond recovery. His friends and relatives became a larmed at the melancholy prospect, and strongly recommended Hunt's Botanic Pills—they were administered, and in a few days produced astoriction while and finally realized a partiety interest. recommended Hunt's Botanic Pilis—they were administered, and in a few days produced astorishing relief, and finally realized a perfect restoration to sound health.

To Mothers and Nurses.

The passage of the teeth through the gums produces troublesome and dangerous symptoms. It is known by mothers that there is great irri-It is known by mothers that there is great irritation in the mouth and gums during this process. The gums swell; the secretion of the saliva is increased, the child is seized with frequent and sudden fits of crying, watching, starting in its sleep, and spasms of peculiar parts; the child shricks with extreme violence, and thrusts its fingers into its mouth. If these precursary symptoms are not speedily alleviated, spasmodic convolsions universally supervene, and soon cause the dissolution of the infant. If mothers who have their little babes afflicted with these distressing symptoms would apply the celebrated American Soothing Syrup, which has preserved hundreds of infants when thought past recovery, from being suddenly attacked with that fatal malady convulsions.

This infallible remedy has preserved hundreds when thought past recovery, from convulsions.

This infallible remedy has preserved hundreds when thought past recovery, from convuisions. As soon as the Syrup is rubbed on the gums, the child will recover. This preparation is so innocent; so efficacious, and so pleasant, that no child will refuse to let its gums be rubbed with it.— When infants are at the age of four months, though there is no appearance of teeth, one bottle of the syrup should be used on the gums to open the pores. Parents should never be without the syrup in the nursery where there are young children, for if a child wakes in the night with pain in the gums, the Syrup immediately gives ease, by opening the pores and healing the gums; thereby preventing Convulsions, Fevers, &c.
