LIVER COMPLAINT. This disease is discovered by a fixed obtuse pain and weight in the right side under the short ribs, attended with heat, uneasiness about the pit of the stomach, there is in the right side also a distension—the patient loses his appetite and becomes sick and troubled with vomiting. The tongue becomes rough and black, countenance changes to a pale or citron color or yellow, like those afflicted with jaundice—difficulty of breathing, disturbed rest, attended with a dry cough, difficulty of laying on the left side—the body becomes weak, and finally the disease terminates into another of a more serious nature, which in all probability is farmed and the power of human skill. Dr. Harlich's Compound Tonic Strengthening & German Aperient Pills, if taken at the commencement of this disease, will check it, and by continuing the use of the medicine a few weeks, a perfect cure will be performed. Thousands can testify to this fact. Certificates of many persons may daily be seen of the efficacy of this invaluable medicine, by applying at the Medical Office, No. 19 North Eighth street, Philadelphia, or sent by Dr. J. J. MYERS & CO., Carlisle, Pa.

IMPORTANT. To Millers & Manufacturers. HOW'S IMPROVED DIRECT ACTION WATER WHEEL. THE public are informed that the subscriber has bought the right of the above water wheel, for the State of Pennsylvania. It is considered by those having them in use, as one of the most important improvements that has ever been introduced. Persons desirous of seeing the wheel, can do so, by calling at the foundry of DAVID COCKLEY, Lancaster. The annexed certificates have been given as a slight testimonial of its superiority over the old water wheels. All communications addressed to the subscriber in Lancaster, Pa., will be promptly attended to. MICHAEL M'MATH, April 11, 1839.

[Copy.] This is to certify, that I have put in one of How's Patent Cast Iron Direct Action Water Wheels, in the place of a Reaction Wheel; that the Direct Wheel does not float the tail race, is much by three inches as the reaction did, and that I can grind seven bushels with the direct action wheel in an hour, and drive two run of stones, where I could not grind four bushels in the same time with the reaction and drive one run of stones. PETER FAINESTOCK, Ephrata pa. Lam. co. Oct. 1838.

Alloway, May 3, 1838. This may certify, that I have been engaged in putting in S. B. How's cast iron direct action Water Wheel, both in the State of New York and in Michigan, and can give it as my decided opinion that with 8 feet head or under, rightly put in, it will do more business with the same water than any other water wheel which I have yet had any experience in, and in reference to back water, is second best to none that I have yet tried. In reference to grinding against ice; there can be no better operation, and it is very easy to be kept running. STEPHEN AILES, Millwright.

Alloway, September 3, 1838. This may certify that I have had in my Mill one of Mr. How's direct water wheels for the space of one year. It is a five feet wheel, and I have had a reaction in the same place—I have also had Wheeler's Union Wheel, yet I think Mr. How's will do more business with less water than any other I have tried. It does well in back water. I have had from 5 to 6 feet head. I think we could do as much work with half the water we used to do with the under shoot wheel, which has also been in operation in my mill. LAWRENCE RILEY.

Lyons, Sept-ber 3, 1838. This may certify, that we have used one of S. How's patent water wheels since December last, by the side of a reaction wheel, and we think that How's will do double the business, with the same water that the reaction wheel will do our very near. We never have but three feet head, and can grind with that eight bushels per hour. We are subject to back water. This wheel will do as good business under back water as the reaction, and we recommend it to the attention and patronage of the public. SIMON BURTT, MILES S. LEACH.
