NOTICE TO BRIDGE BUILDERS.

THE Commissioners of Cumberland county will receive proposals at the house of John Cornman, innkeeper, in the borough of Carlisle on Thursday the 16th of April next, between 9 and 12 o'clock in the forenoon, for the erection of a good and substantial bridge over the Yellow Breeches creek, at the place where the public road from the Brandywine crossing, crosses said creek, in the township of Monroe, of the following dimensions, to wit: To contain in length from one abutment to the other 90 feet, and 46 feet wide in the clear, the abutments to be above the natural elevation of the ground, and to be a sloping direction, with a regular slope, and to be eight feet high from the bottom of the creek; from whence a wooden arch is to be started and to extend across said creek from one abutment to the other, supporting a good and substantial bridge, the floor to be double flored, with two inch plank, the upper floor oak and the lower yellow pine, the sides and gable ends to be sufficiently high to admit covered hay wagons to pass through the same, 12 feet in the clear, to be closely weather boarded on the inside, and to be well roofed with good white pine shingles; the whole of the wood work to be well secured with iron bolts, ready eyes, &c. From the back of the abutments the filling shall consist of earth and stone, and to be raised to the level of the walls three feet high above the filling on each side, and to extend in that manner on the two extreme sides of the bridge until the filling and walling shall meet the road with an ascent and descent not exceeding five degrees elevation from the road level; the bridge to be built of sound and substantial timber, the stone work of large good stone, lime and sand mortar well pointed. The party contracting to give such security as the Commissioners may require for the faithful performance of the workmanship and permanency of said bridge. Proposals to be accompanied with a plan—Should none of the proposals meet the approbation of the Commissioners they will on the same day, between 12 o'clock in the afternoon, return the said bridge to public sale, and sell the same to the lowest and best bidder.

WOODEN BRIDGE.

across the Yellow Breeches creek, at the place where the public road from the Brandywine crossing, crosses said creek, in the township of Monroe, of the following dimensions, to wit: To contain in length from one abutment to the other 90 feet, and 46 feet wide in the clear, the abutments to be above the natural elevation of the ground, and to be a sloping direction, with a regular slope, and to be eight feet high from the bottom of the creek; from whence a wooden arch is to be started and to extend across said creek from one abutment to the other, supporting a good and substantial bridge, the floor to be double flored, with two inch plank, the upper floor oak and the lower yellow pine, the sides and gable ends to be sufficiently high to admit covered hay wagons to pass through the same, 12 feet in the clear, to be closely weather boarded on the inside, and to be well roofed with good white pine shingles; the whole of the wood work to be well secured with iron bolts, ready eyes, &c. DR. WM. EVANS' CAMOMILE PILLS.

A severe case of Piles cured at 100 Chatham street, New York.

The passage of the teeth through the gums produces troublesome and dangerous symptoms. It is known by mothers that there is great irritation in the mouth and gums during this process. The gums swell, the secretion of the saliva is increased, the child is seized with frequent and sudden fits of crying, watching, starting in its sleep, and spasms of the face; the child shrieks with extreme violence, and thrusts its fingers into its mouth. If these precursory symptoms are not speedily alleviated, spasmodic convulsions universally supervene, and soon cause the dissolution of the infant. Mothers who have their infants afflicted with these distressing symptoms would apply the celebrated American Soothing Syrup, which has preserved hundreds of infants when thought past recovery, from being suddenly attacked with that fatal convulsion.

This infallible remedy has preserved hundreds when thought past recovery, from convulsions. As soon as the Syrup is rubbed on the gums, the child will recover. This preparation is so innocuous, so efficacious, and so pleasant, that no child will refuse to take it, and it is perfectly safe. When infants are at the age of four months, though there is no appearance of teeth, one bottle of the Syrup should be used on the gums to open the pores. Parents should never be without it, as it is a most valuable remedy for the young children, for if a child wakes in the night with pain in the gums, the Syrup immediately gives ease, by opening the pores and healing the gums; thereby preventing Convulsions, Fevers, &c.

Beware of Counterfeits.

Caution.—Be particular in purchasing to see that the label of this medicine contains a notice of its entry according to Act of Congress.—And be likewise particular in obtaining them at 100 Chatham st., New York, or from the regular agents,

HAMILTON & GRIER, Carlisle.

DR. HUNT'S BOTANIC PILLS.

INTERESTING & APPLICABLE TO THE AFFLICTED WITH Diseases of the Stomach, or Nerves;

Such a Dyspepsia, either Chronic or Casual, arising from the impurities of the blood, or from the action of Spasms, or from the action of the Lungs or Liver; Liver Affections; Jaundice, both Biliary & Spasmodic; Constipation; Worms of every variety; Rheumatism, whether Acute or Chronic; Dropsy, in its various forms; Headache, Pain in the Head, Back, Limbs, and Side; Typhus Fever, Scarlatina, Putrid Sore Throat, Fever & Ague, Spasmodic Palpitation of the Heart and Arteries, Nervous Irritability, Nervous Weakness, Hysteria, the Stomachic, Cramps, Female Obstructions, Heartburn, Headache, Gout, the Common or Humid, and the Dry or the Whooping; Asthma, Gravel, and Dropsy.

The Blood has hitherto been considered by Empirics and others, as the great regulator of the human system, and such is the devoted of the adherents to that erroneous doctrine, that they content themselves with the simple possession of this fallacious opinion, without enquiring into the primary sources from whence Life, Health, and Vigor emanate, and to which Pain, sickness, disease and death. Not so with Dr. Hunt, whose extensive research and practical experience so eminently qualify him for the profession of which he has been one of the most useful members. He contends—and a moment's reflection will convince any reasoning mind of the correctness of his views—that the stomach, liver, and the associated organs are the primary and great regulators of health, and that the blood in very many instances, is not the cause, but the effect of disease. He contends—and a moment's reflection will convince any reasoning mind of the correctness of his views—that the stomach, liver, and the associated organs are the primary and great regulators of health, and that the blood in very many instances, is not the cause, but the effect of disease. He contends—and a moment's reflection will convince any reasoning mind of the correctness of his views—that the stomach, liver, and the associated organs are the primary and great regulators of health, and that the blood in very many instances, is not the cause, but the effect of disease.
