Acute Bronchilis, a forerunner of Consump-tion,— This disease is very much like a common catarrhi it generally commences like an ordin-ary cold, with lassitude, chilliness, slight cough-and oppression and tightness about the breast. In many instances the disease seems at first of no very serious character. As the disease con-tinues the oppression in the breast increases, the countenance becomes expressive of anxiety the respiration becomes more and more laborithe conntenance becomes expressive of anxiety the conntenance becomes expressive of anxiety the respiration becomes more and more labori-ous, sometimes wheezing or raiting sounds, as if the air way forced through a matrow appen-ture clogged with a viscid fluid. To neglect this disease it may be of serious consequences, but by a timely application to Dr. Swayne's Comjound Syrah of Wild Cherry, with a strict attention to the directions, all thesa unpleasant effects will be removed. Be careful, as it is sold at no place except at No. 19 North Eighth st. or at the respective agents For sale by J. J. MYERS & CO.
