Carroll, of the county of Westchester, town of North Castle, New York, had been severely afflicted with inflammatory rheumatism for fourteen months with violent pains in his limbs, great heat, excessive thirst, dryness of skin, limbs much swollen, was not able without assistance to turn in bed for six weeks.

ALLEN TOWNSHIP IN THE FIELD!
On Saturday the 8th of August, a number of the citizens of Allen and the adjoining townships, assisted by some of their democratic brethren from York county, met at the public house of David Shaeffer in Shepherdstown, for the purpose of erecting a Liberty Pole in room of one that had been cut down by some unprincipled Tory.

Harrison's plan in keeping up the militia, "as it now exists, for the ordinary duties of muster discipline," would burden all the subject to that duty, throughout the Union, to the expense of arms and accoutrements, militia fines, loss of time, &c. All this is done away with in Mr. Poinsett's proposition.

The 14th of July passed over in Paris quite peaceably, notwithstanding that an immense number of operatives are without employment, and consequently in great distress.
The French papers mention that Prince Augustus of Saxe-Coburg, brother of the Duchess of Nemours, is to marry the Princess Clémentine.

The Blood has hitherto been considered by Empirics and others, as the great regulator of the human system, and such is the devotion of the adherents to that erroneous doctrine, that they content themselves with the simple possession of this fallacious opinion, without possessing in the pri maxims from whence Life, Health, and Vigor emanate, and vice versa pain, sickness, disease and death. Not so with Dr. HUNT'S extensive research and practical experience, which has been one of the most useful members. He contends—and a moment's reflection will convince any reasoning mind of the correctness of his views—that the stomach, liver, and great regulators of health, and that the blood in very many instances is dependent on these organs, and that unless medicine reaches THE ROOT OF THE DISEASE, the superficial anodyne usually prescribed, serve but as a foil to cover the progress of decaying humors.

GEN. HARRISON'S PLAN PROPOSED.
1. The educating of every boy in the U. States at the public expense. These are his statistics, in his report of the 19th January, 1817, on this head.

He gives then the details—for which we have not room, upon the supposition that Congress would allow "full pay," and he thus sums up the aggregate:
"Estimating the whole United States militia at a million, then the total expense of training the officers of the militia would be some hundred thousand dollars less than two millions."

Steamboat Explosion and loss of Life.
The Buffalo Commercial Advertiser says:—One of these unfortunate occurrences, hitherto almost unknown on our lakes, took place at half past 11 o'clock on Tuesday morning, on board the Erie, Captain Titus.

2. To classify the militia, and he made the whole mass of the militia, as it at present exists in the States, continue burdened with the charge of furnishing their own arms, as under the first militia law, which remains in force and also burdened with the repeated mustering under the old law.

Mr. Poinsett's estimate, which provided to pay the men, as well as the officers, for their loss of time when training, amounted to a HALF MILLION ONLY!
So much for the burdens which the Harrison system and that of the Secretary would impose upon the Treasury and the class in our country subject to militia duty.

Our citizens have very frequently within the last two years, been subjected to gross insults from the insolent slaves of her Majesty on the opposite shore in passing up and down the Niagara river. On Monday, as a large company of ladies and gentlemen were returning to this city from a pleasure excursion to the Falls, in the steamboat Chesapeake, they were fired into by a company of blacks who are kept stationed opposite the point where the channel approaches nearest to the Canada shore.

FEVER AND AGUE CURED.
To Dr. Hunt.
Dear Sir,—Believing it a duty I owe you as a successful practitioner, as well as those who may be similarly afflicted, I take pleasure in acknowledging the benefit I have derived from the use of your valuable medicine.

DR. HUNT'S BOTANIC PILLS
After much suffering from Fever and Ague, during the spring and for the last four years, and the pecuniary injuries attendant on the indisposition of one who exercises a large family was dependent for support, and having without success tested the skill of many medical advisers, at an expense I could not well afford. In the fall of 1836, finding the precursory symptoms of the disease approaching, I was induced by a friend who had tried your medicine, to purchase a package of your Botanic Pills, and now have the happiness to inform you—and through you, those who may be similarly afflicted—that they contracted the disease, nor have I been troubled with it since, and my confidence continues to uphold me in the belief that your Botanic Pills are the most safe, the cheapest, most efficacious, and radical cure for that distressing disease, Fever and Ague. All I can for the present offer you for the blessing you have been instrumental in conferring on me, is my assurance of unceasing gratitude and esteem.

A Meeting of citizens has been called at the Court House this evening to adopt peaceable measures to obtain redress for this outrage, if possible. We hope their efforts may be crowned with success. If not, they must stand in their own defence.

A Mother's Love.—This glorious principle of the human breast was finely illustrated a few weeks since in England. A poor woman, living near Chacewater, missed her child, a little boy about two years old, and after a few minutes search discovered him at the bottom of a well 12 feet deep, containing eight feet of water.

Mr. T., though not personally acquainted with the Judge, knew him to be one of the most influential members of the legislature, and of politics opposed to his own. Being once informed that the Judge was then at the village stage house, Mr. T. proceeded thither and commenced abusing the Judge, in a loud and boisterous conversation with the other, on account of some of his public acts.

JOHN.—We have thought that this ancient name would be handed down to the latest generation, and we now doubt not that the latest inhabitant of this world, when his business is wound to a close, will be a "John," and in the world to come, the last name on the list of debtors to grace will be a "John"; we infer this from the rapid increase of "Johns," and we fear that the name "John" will be given to every body. Step into the street and the first name you hear is "John"; go into the crowd, and "John" is the first to greet you; if any thing is wanted, just call "John"; a burglary committed, "John" has done it; a wedding on hand, "John" is a party; a defalcation, "John" is off to Texas; a row in the street, "John" is its author; slander going the rounds, "John" is its retailer; a loafer brought before the Police Court, "why is that you, John?" a witness wanted, call "John"; a funeral invitation, "Ah, poor John is dead"; a mob raised, "John" is at its head; a writ to be served, "John" is the very man, no other name will answer. Heaven be praised that our name is not "John." Oh, John, John, what a black list will appear against thee at the day of reckoning.

A CAUTION.—It is stated that a rather elderly young lady in this State, has brought an action of breach of promise against a neighboring schoolmaster, for an alleged breach of promise of marriage. The chief evidence was, that the said pedagogue had come over to her house and took tea twice a week for ten years. This should operate as a caution to all schoolmasters, how they take tea more than once, in regular succession, with antiquated spinsters.—Dost. Traveller.

THE WAY THEY ENFANEL JURIES AT THE WEST.—A judge in one of the new counties in Western Virginia, inquired of the sheriff whether he had made up a jury. The sheriff replied that he had empanelled eleven, and expected to have the other soon, as they were running him with dogs.

A CROOKED PARAGRAPH.—We find the following crooked paragraph in an exchange paper. The editor must have written it diagonally across his paper with a corkscrew: "There is only one way to reach the people, and that is by an honest, up and down, straight forward course."
