Carlisle, Dec. 30, 1841.

The compliments of the season to all our patrons. We wish them health, peace and plenty—warm hearts and willing hands to relieve the necessities of the poor. To the single ladies we wish husbands, and to the old bachelors, wives. If some of them that we have in our mind's eye don't soon "jump the broomstick," they'll have to, (as Dr. Franklin would say,) "rock the cradle in woollen mittens"—that's all.

Our Carrier has requested us to announce that he will pay a visit of compliment to his friends in the Borough, on Saturday morning next, when he expects them to greet him with a substantial welcome.

CAfter this week we shall get rid of nearly three columns of Tavern License Advertisements, which will give us a little more "elbow room.".

Hon, JAMES BUCHANAN.—Upwards of thirty of the Democratic papers in Pennsylvania have already expressed their preference for this gentleman for the next Presidency, amongst which are some of the principal leading ones of the State. Nor is the feeling confined to Pennsylvania alone; the papers in some other States are beginning to move in his favor, and, from present appearances, we should judge that his chânce for the ination, is now the best of any of the distinguished men in the Democratic party, whose names have

been mentioned for the high station.

We commence extracting from the papers above mentioned, this week—and shall follow it up from time to time to show our readers the current of public

Shin Plasters .- The Town Council have called a meeting-of the citizens of this Borough, for this evening, (Thursday) in the Court House, to "consider the subject of issuing SMALL NOTES"—that is, to issue shinplasters under one dollar. As this is a subject which interests every person, in a greater or less degree, we opine that the attendance will be general. We are aware that the Council have been petitioned on the subject, and we think they acted very properly in submitting it to the people. We hope that the opponents of the measure, (and we trust that a majority of the citizens will be found in opposition.) will turn out to the meeting and promptly vote down the project. If the thing is not nipped in the bud, we suppose the Council will make the issuesand then good bye to every thing like silver coin of

any kind. We are opposed to the project for the following reasons, amongst others :- First, It would be unconstitutional and contrary to law-Secondly, It would entirely drive specie out of circulation-Thirdly, It would furnish Countenraitens with a fine opportunity of cheating the people—Fourthly, It would be a fraud on the community, inasmuch as the paper would be issued without any real substantial basis, and being done in open violation of the plain law of the land, succeeding Council might refuse to redeem the issues and it is questionable, to say the least of it, whether they could be compelled-And, Fifthly, because we deem it neither expedient nor necessary, as there is andoubtedly a sufficiency of silver in the community for all the purposes of change under one dollar.

17 We look upon the movement of the Council ers as *premature,* **ins** as it is believed, that, at the ensuing session, the Legislature will adopt some measure calculated to bring about a speedy resumption by the Banks. Should the Legislature fail in their duty to the public, in this particular, it would then be time enough, and there might be some feeble excuse for inundating the community with rag money trash. But until all hopes of re sumption are abandoned, we think the Council ought to pause and consider.

The discussion of the Tariff question was still going on in the House of Representatives at Washingington, at the date of our latest advices. The question is, whether that portion of the President's Messago re lating to the Tariff shall be referred to the Committee on Manufactures, or the Committee of Ways and Means-the High Tariff men advocating the former, the moderate men the latter. It is doubtful to which Committee the subject will be referred.

Up to the time our paper was put to press or yesterday, we had received no intelligence of the decision of the Court in Philadelphia, on the subject of the presentment of the Grand Jury in the case of Biddle & Co. The opinion of the Court was to have been delivered on Friday last-not on the previous Monday, as at first announced.

DAILE PAPERS.—Those of our friends who wish to have the earliest and most correct information of the doings of the Legislature, had better subscribe without delay for one of the proposed daily papers. The "Keystone," "Reporter," and "State Capitol Gazette," are all excellent Democratic journals, and every man can have "pick and choice." The subscription price for the session is only \$2.

Mesers. Buchanan and Gustine will accept our thanks for public documents, &c.

The Legislature of Georgia has passed a bill compelling the Banks of that State to redeem their liabilities in specie. Holders of notes are allowed to sue on FIVES after the first of March, the TERS some months thereafter, and so on at intervals up to the highest denomination.

( At the urgent solicitations of a large number of the citizens of Philadelphia, THOMAS L. SHUSTER, convicted of the murder of his wife, and, sentenced to be executed to-morrow, (31st inst.) has been respited by the Governor, until the 27th of May next.

The storm of the 17th inst., was productive of a number of shipwrecks and a great destruction of property along the coast. Such is always the case, in greater or less degree, with every severe north-east storm, whether accompanied with snow or otherwise.

people.
"We do not profess," says the Keystone, "to be gifted with a foresight that will enable us to throw any light upon this subject. Few, however, of our readers an be ignorant of the fact, that, notwithstanding the overwhelming majority by which Governor Poursa was re-elected, there is one branch of the Legislature in which parties are in a most equivocal position-and unless the Executive is sustained in that body, he may again be doomed for another year to be thwarted in the onsummation of measures, which will have for their object the advancement and prosperity of the State-This does not arise from any fault of the people, but from an apportionment of the Senatorial districts, made by men, who, when in power, "threw conscience to the devil," and logislated for themselves and their par tisans, and not for the good of the whole.

"Discretion on the one part, and energy and indus try on the other, will tend much to relieve the difficulics our State will have to encounter. The public in terest will require a most careful supervision;-a rigid accountability should be exacted in every department whilst every effort should be made to preserve the pub lic faith inviolate. The discussion of questions which are calculated to embroil the members in unnecessar debate, should be avoided—and above all let no quack palliatives be offered to remedy the currency. The knife must be applied, if the disease is to be cradicated Pennsylvania, rich in her ininerals—powerful in her gigantic public improvements—with a population of hardy and intelligent sons, whose integrity is unsullied; and whose chivalry is undaunted—can have little to fear from the approaching storm. With a helmsman like our present patriotic Chief Magistrate, she cannot fail to reach the haven of safety."

We think we can suggest to the Legislature laws, which would be attended with but a very trifling with the people. Our plan is to lop off the printing of at least one-half the journals, pamphlets and documents, that are never read by any body, and appropriate the money so saved to the publication, in the newspapers throughout the State, of all, laws of a general tion.—Baltimore Sun nature. This would furnish every body with an opportunity of becoming acquainted with the statutes and make the maxim true in reality, that "ignorance of the law excuseth no man." As at present published any thing about the laws enacted from time to time by the Legislature-hence the great amount of litigation in the community, and the necessity of applying to Lawyers for advice.

The Commissioners of each County, might be authorized to have published at their discretion all laws of a local nature, at the expense of the county. This would be attended with very little cost, and would be highly satisfactory, we think, to the citizens of the county interested.

We throw out these suggestions for the considera tion of the Legislature, and the people. We think the subject merits attention. Who amongst our brethren of the press will second the motion?

THE INAUGURATION .- We see it stated in one of the Harrisburg papers, that several companies of Volnteers from Philadelphia and other places are expect ed to attend the inauguration of Gov. Ponten, on the 18th of January. What say our Cumberland Volum teers to joining in the ceremony? We trust they wil not be behind their brethren of the city in paying honors to their Commander-in-Chief. An excursion of this kind would doubtless be a very pleasant one, and we are sure they would have no cause to regret it hereafter. We should like to see the Volunteers of old Cumberland as patriotic as their neighbors, particularly as we happen to know that they are held in

INDIANA.—It appears from the message of the Governor of Indiana, that the finances of that State are in a most deplorable condition—the public debt amount ing to upwards of fifteen millions of dollars, and the available means of discharging the interest upon it. being only \$56,000. Under such circumstances it is utterly impossible to preserve the credit of the State. This the Governor candidly admits; but urges the necessity of making every effort, by developing and properly applying the resources of the State; to finally liquidate the debt. The same error was committed in Indiana, which characterised the legislation of Maryland and other States, viz: too many extensive works of internal improvement were undertaken without due consideration as to how the means of their construction in State stocks or bonds. I have reason to liquidate the debt. The same error was committed in were to be raised-and the consequences are such as might have been anticipated. The Governor gives a fuir and manly exposition of the actual condition of Indiana; and notwithstanding her apparently desperate condition, sets his face most firmly against the dishor est doctrine of the repudiation of the public debtdoctrine which, if practically carried out by any State, will brand it with deserved infamy.-Balt. ROBBERY .- A Large Haul .- One Thousand Dollars Reward.-About one o'clock on the afternoon of Monday week, a small room in the Patent Office building, Washington, adjoining the National Gallery, was entered by means of false keys, and several articles stolen, the value of which is estimated at from fourteen to fifteen thousand dollars. The articles stolen were, an elegant and costly gold snuff box set with diamonds, having the letter "A" in diamonds on the lid; a pearl neck-lace, consisting of 148 pearl; also two very large ones separate, sent to the President by the Imaum of Muscat. A gold scabbard was also taken: lecided improvement in the manner of publishing the the sword belonging to which was left, doubtless to enable the thicf to put the scabbard into a convenient additional expense, and would doubtless be popular form to be secreted on his person and carried off. At the opening of the session it was considered necessary to have some standing rules, whereby the
