I find that large quantities of water can be heated with it in a short time; that for cooking it boils, roasts meat, and bakes bread. Messrs. E. Robinson & Co.—Gentlemen:—According to your request, I have given one of "Hathaway's Patent Hot Air Cooking Stoves" a thorough trial, and in my opinion think it one of the best now in use. I have had a Rotary stove in use for newers was and an decidely in face of your A very superior article of Sperm Oil may be several years, and am decidedly in favor of your stoves-they do not consume as much fuel as the Rotary, and are better adapted for baking, and e qually as well for any kind of cooking.

J. CULBERTSON. Chambersburg, September 6, 1841.

I have in use in my kitchen one of Hathaway's Patent Hot Air Cooking Stoves, and can recommend it as a very superior article. The one I have is No. 3, it has 5 boilers and an oven sufficiently large to bake 6 loaves of bread. The baking, roast large to bake 6 loaves of bread. The baking, roasting and boiling, can be done at the same time and with much less wood that required for any stove I have ever used. This size appears to be pcculiarly calculated for Farmers, and for their benefit invite them to call and see this stove in use, as I shall take pleasure in showing the stove to those who wish to see it.

Coulist Section 10, 1841.

Carlisle, September 12, 1841. Messrs. E. Robinson & Co.

Gentlemen:-I have fairly tested the "Hot Air Stoves" which you put up at my house and can recommend it as possessing principles of economy and convenience far surpassing any other stoves which I have ever seen. The boilers coming in immediate contact with the fire gives it great facilities for boiling, and the oven is heated on such a principle that bread is baked in as fine a manner as in a brick oven. I find it also a great saving of fuel and labor, and would advise all to adopt it.

M. McCLELLAN.

Carlisle, September 12, 1841. Messrs. E. Robinson & Co.

Gentlemen.—I have during the few days I have had your Hathaway Hot Air Stove in use become convinced of its great superiority over all other stoves I have used or seen—I find by the trial that boiling, roasting, baking and broiling may all be dome at the same time, in a most perfect manner and with less than one fourth the fuel I have ordinarily used for the same purposes. I have heretofore been of the opinion bread could not be well
baked in a Cook Stove, but I am convinced upon
frial that it can be done as well in your stove as in

a brick oven. I believe that the general introduc-tion of your stoves into use will be very beneficial to the public, therefore I shall take pleasure in reo the public, therefore a summer of the public to my friends WM. MOUDY.
