

The American Volunteer

BY JOHN B. BRATTON.

VOL. 33.

CARLEISLE, PA., THURSDAY, JUNE 10, 1847.

AT \$3 00 PER ANNUM.

NO. 52.

IT NEVER FAILS.

DR. CULLEN'S

Indian Vegetable Panacea.

Persons afflicted with Scrofula, Kings' Evil, Cancer, Erysipelas, Old sores, Ulcers, Tetter, Menstrual Diseases, or any other complaints arising from impurities of the blood, are requested to read the following testimonials, in proof of the wonderful properties of the above named medicine.

READ! READ! READ!
Mr. B. informed us that in January last, the whole interior of his mouth, as well as most of his face, was a mass of deep and painful ulcers. On the 14th of January last, he commenced taking Dr. Cullen's Indian Vegetable Panacea, which checked the disease in a few days, and from that time the cure has proceeded with uninterrupted success. New flesh has supplied the place of the deep ulcers, and though badly disfigured, his face is sound, and his general health is restored. We are assured that in the treatment of Mr. Brooks' case, no Mercurials, Ointments, or Caustic Applications have been used in fact, the Panacea Alone, has wrought the wonderful change.

David Smith, Bucks county, Pa.
Charles E. Rowand, Meadville, Crawford Co., Pa.
J. W. Jones, M. D., 2nd Street, Phila.
Jacob Lee, Pemberton, N. Jersey.
E. W. 440 N. Fourth, at Phila.
S. McCullough, Lancaster, Pa.
Wm. Haddock, 38 N. Second, Phila.
C. W. Appleton, M. D., 46 South St. Phila.
Daniel Caldwell, Marion county, Missouri.
Timothy Yeckel, Chesnut Hill, Philadelphia Co.
John Harrod, 300 High Street, Phila.
Wm. Steeley, M. D., Camden, N. J.
Wm. Hale, 378 High Street, Phila.
John Bell, Erie, Pa.
Ardie Smith, 116 Chaharrie St. Phila.
Daniel McGinley, Kessler's Alley, Phila.
Andrew Swanton, Camden, N. J.
R. H. Evans, West Philadelphia.
Richard R. Young, Gillet 409 Market St. Phila.
John W. Ashland, 60 South 6th Street, Phila.
T. S. Wagner, Lithographer, 116 Chestnut St. Philadelphia.

Dr. R. Smith, 123 1/2 North 11th St., Phila.
P. S. Knott, 123 1/2 North 11th St., Phila.
P. S. Knott, 123 1/2 North 11th St., Phila.
P. S. Knott, 123 1/2 North 11th St., Phila.
P. S. Knott, 123 1/2 North 11th St., Phila.
P. S. Knott, 123 1/2 North 11th St., Phila.

P. S. Knott, 123 1/2 North 11th St., Phila.
P. S. Knott, 123 1/2 North 11th St., Phila.
P. S. Knott, 123 1/2 North 11th St., Phila.

The above named gentlemen, (constituting but a small portion of those who have visited Mr. Brooks at our office in Philadelphia, and would certify to the same acts if necessary) are well known, and their high standing in society, particularly in the case of Dr. Cullen, which was pronounced by physicians beyond the reach of Surgical assistance, but from all appearances will be cured in a few months.

Sold wholesale and retail by ROWAND & WATSON, Proprietors, No. 376 Market St., Philadelphia, and also by the following regularly authorized agents.

Samuel W. Haverstick, Carlisle, Pa.
William Bush, Newville.
Samuel H. Buehler, Gettysburg, Pa.
C. A. Morris & Co., York, Pa.
Carlisle, Dec. 3, 1846.—ly

DR. CULLEN'S

INDIAN VEGETABLE SPECIFIC FOR PLEURISY, MALARIA, &c.

This medicine is fast taking the place of every preparation heretofore used for diseases arising from weakness or other causes. All that is necessary to secure this medicine a place in the Domestic Practice of every family, when such a medicine is needed, is a trial. It speaks for itself, is innocent in its operation, and its use is attended with the most successful results. It is sold by Dr. Cullen, and by the following regularly authorized agents.

Samuel W. Haverstick, Carlisle, Pa.
William Bush, Newville.
Samuel H. Buehler, Gettysburg, Pa.
C. A. Morris & Co., York, Pa.
Carlisle, Dec. 3, 1846.—ly

Poetical.

GO FORTH INTO THE COUNTRY.

Go forth into the country,
From a world of care and guile,
To the sunshine of an open hill,
To the coolness of a mountain side,
To the softness of a valley floor,
To the freshness of a morning dew,
To the beauty of a sunset glow,
To the peace of a quietude,
To the joy of a simple life,
To the love of a true friend,
To the hope of a better world,
To the faith of a just God,
To the life of a noble man.

To the life of a noble man.

man was ordered to be seized; lantern lighted, and a party set off to retreace the road, headed by the humane lawyer. No infant, however, was to be found; and after groping about till they were all thoroughly drenched, they returned to the inn. The lawyer was surprised to find that the Frenchman had taken his place in the coach, which was now out of sight.

Observations and Reflections.

A large portion of mankind do not know the value of observation and reflection. Many complain of the want of opportunity in their youth, for acquiring knowledge, and make it an excuse for remaining ignorant all their lives. But the opportunity is not so well founded, as they suppose, for if they would observe with attention the facts and occurrences that daily pass under their notice; and exercise their reason upon them, a habit of mind would be formed which would make the acquisition of knowledge easy and agreeable. Men, who from social and domestic natural inclinations, are desirous to be useful, and who are well founded in their desire, for if they would observe with attention the facts and occurrences that daily pass under their notice; and exercise their reason upon them, a habit of mind would be formed which would make the acquisition of knowledge easy and agreeable.

Hints About Bedrooms.

Their small size and their lowness render them very insalubrious; and the care is rendered worse by close windows and thick curtains and hangings, with which the beds are often so carefully surrounded as to prevent the possibility of the air being renewed. The consequence is, that we are breathing vitiated air during the greater part of the night; that is, during more than a third part of our lives; and thus the period of repose, which is necessary for the renovation of our mental and bodily vigor, becomes a source of disease. Sleep, under such circumstances, is very often disturbed, and always much less refreshing than when enjoyed in a well-ventilated apartment. When it is known that the blood undergoes most important changes in its circulation through the lungs by means of the air which we breathe, and that these vital changes can only be effected by the respiration of pure air, it will be easily understood how the healthy functions of the lungs must be impeded by inhaling for many successive hours the vitiated air of a bedroom, and how the health must be consequently destroyed by respiring impure air, as by living in unwholesome or insalubrious food. In the case of children and young persons predisposed to consumption, it is still more urgent a consequence that they should breathe pure air by night as well as by day, by securing a continuous renewal of the air in their bedrooms, nurseries, schools, &c. The mother, who has never made this observation in the care of her children, go from pure air into their bedrooms in the morning before a door is opened, and remark the state of the atmosphere—the close, oppressive, and often fetid odor of the room—and she may cease to wonder at the sickly aspect of her children. Let her play a similar vital source, opening after the door has been taken by the chimney ventilator, to secure a full supply and continual renewal of the air in the bedroom as during the night, and she will be able to account, for the more healthy appearance of her children, which is sure to be the consequence of supplying them with pure air to breathe.—See James Clark on the "Sanative Influence of Climate."

Sleep, under such circumstances, is very often disturbed, and always much less refreshing than when enjoyed in a well-ventilated apartment. When it is known that the blood undergoes most important changes in its circulation through the lungs by means of the air which we breathe, and that these vital changes can only be effected by the respiration of pure air, it will be easily understood how the healthy functions of the lungs must be impeded by inhaling for many successive hours the vitiated air of a bedroom, and how the health must be consequently destroyed by respiring impure air, as by living in unwholesome or insalubrious food. In the case of children and young persons predisposed to consumption, it is still more urgent a consequence that they should breathe pure air by night as well as by day, by securing a continuous renewal of the air in their bedrooms, nurseries, schools, &c. The mother, who has never made this observation in the care of her children, go from pure air into their bedrooms in the morning before a door is opened, and remark the state of the atmosphere—the close, oppressive, and often fetid odor of the room—and she may cease to wonder at the sickly aspect of her children. Let her play a similar vital source, opening after the door has been taken by the chimney ventilator, to secure a full supply and continual renewal of the air in the bedroom as during the night, and she will be able to account, for the more healthy appearance of her children, which is sure to be the consequence of supplying them with pure air to breathe.—See James Clark on the "Sanative Influence of Climate."

Hints About Bedrooms.

Their small size and their lowness render them very insalubrious; and the care is rendered worse by close windows and thick curtains and hangings, with which the beds are often so carefully surrounded as to prevent the possibility of the air being renewed. The consequence is, that we are breathing vitiated air during the greater part of the night; that is, during more than a third part of our lives; and thus the period of repose, which is necessary for the renovation of our mental and bodily vigor, becomes a source of disease. Sleep, under such circumstances, is very often disturbed, and always much less refreshing than when enjoyed in a well-ventilated apartment. When it is known that the blood undergoes most important changes in its circulation through the lungs by means of the air which we breathe, and that these vital changes can only be effected by the respiration of pure air, it will be easily understood how the healthy functions of the lungs must be impeded by inhaling for many successive hours the vitiated air of a bedroom, and how the health must be consequently destroyed by respiring impure air, as by living in unwholesome or insalubrious food.
