

**Tuition in French.**  
MR. CHAS. MARECHAL, a native of France, who has been educated in Paris, announces to the Ladies and Gentlemen of Carlisle, that he is desirous to receive a class of pupils to instruct in his native language. He has been for more than a year giving instructions to the citizens of Gettysburg, and the students of Pennsylvania College at that place. He brings letters from the Professors and gentlemen of Gettysburg, who have studied under his direction, giving him the greatest credit both as a man of good character and successful instructor.  
His terms are \$8 for forty lessons—each lesson to consist of one hour.

**To Butter Makers.**  
THE subscribers having purchased the right of Cumberland county for making Crowell's Patent Thermometer Churns, they would respectfully inform the Farmers and the public in general, that they will make and offer for sale these churns at the Cabinet Warehouse of George Spangler, in North Hanover street, next door to David Smith's office. The principal advantage this churn has over all other churns is, that it is so constructed that the top can be turned off as to give free access to the inside of the churn, which makes it convenient to put in the cream and get out the butter. A thermometer is attached to the one end of the churn so as to show the exact temperature of the cream, which experience shows should be 80 degrees to make good butter. A chamber of space is arranged around the bottom of the churn for the purpose of admitting cold or warm water, so as to bring the cream to the desired temperature without mixing the water with the cream. The secret in churning butter is to have your cream at the proper temperature—it will produce more and better butter and take less time in churning—it churns equally well in cold or warm weather. First, great care is taken in getting butter the average time of churning being about fifteen minutes, (all weather) we have got butter in the short space of ten minutes. Secondly, the butter when obtained is much firmer than when using any other churn. Finally, my full faith they will not exchange for any other churn and twice the original cost of the Thermometer churn.  
Yours, &c.  
GEO. W. SHEAFER.  
September 28, 1848.

**Mr. George Spangler.**  
I have the Crowell Thermometer Churn put in for me in use at my place, and I do not hesitate to say that no farmer should be without it. Fifteen minutes is all the time required to make butter, and this is all the saving of time and labor consists in that another, and that the temperature of the cream, necessary to make butter, is produced with certainty and without the admixture of warm or cold water with the cream itself.  
FREDK. WATTS.  
August 17, 1848.

**To the Public.**  
For the benefit of the better part of man (woman) I give this certificate after using the Thermometer churn made by Mr. George Spangler of this place. I have been using the Thermometer churn for thirty years past, and I must say it is not to be compared to any other Thermometer Churn; either for speed of churning or convenience. In the old barrel churn it took generally from four to six hours to churn the churning; now the Thermometer churn we can churn butter from fifteen to twenty minutes, by bringing the cream to the proper temperature. I can recommend it to the public as no cheat.
