

The Leading Periodical in America.

GODEY'S LADY'S BOOK FOR 1849.

DEDICATED to the Ladies of the United States. Edited by SARAH J. HALE, GRACE GREENWOOD, and L. A. GODEY.

A Novelle by Miss E. LESLIE, who contributes to every No.

N. P. WELLS' Original Scriptural Poetry. T. S. ASSHUTON'S contributions to every No., illustrative of Croome's Sketches of American Character.

We intend merely to give a notice of our intentions for next year, leaving to others long advertisements—a full and free, signifying nothing.

Agreeably to the practice of last year, the publisher will issue the book in the month of January in Magazine publishing.

During the whole of last year he gave more engravings and more reading matter than any of his contemporaries, and will continue to do so next year.

Those who subscribe to GODEY'S LADY'S BOOK, may do so under the assurance that they will receive more for their money in the Magazine alone, than by subscribing to any other work.

To this is added and included in the same \$3, the LADY'S NEWSPAPER, which contains in one month nearly, if not quite as much reading matter as the other monthlies, making for \$3, the amount of reading two magazines in the same time.

Godley's Lady's Book for the ladies that no other Magazine possesses. There is a Mezzotint and Line Engraving in each number—both by the best artists.

In addition to these, there are given monthly what no other magazine gives—a colored Fashion Plate, with a full description.

This feature is peculiar to Godley, as no other work has every month and address the ladies with Caps, Bonnets, Chemises, Equestrianism for Ladies, with Engravings, "The Ladies' Work Table," with designs for knitting, netting, crocheting, and all other kinds of work.

Patterns for Smoking Caps, Chair Covers, Window Curtains, D'Oyley's, Purse, Bags, &c. Health and Beauty, with Engravings, "The Cottage Furniture," and other engravings, always illustrative of something useful.

Music, beautifully printed on tinted paper, which may be taken out and bound. Colored Modern Cottages, and colored Flower Pieces occasionally. These are all extra in Godley, and to be found in no other magazine.

These were all given last year, and will be continued in the same manner in every No., one of "Croome's Sketches of American Characters," a most amusing series, now first given to the American public.

These will be illustrated in every No. by a story from the powerful pen of T. S. Arthur, Esq. "The Changes of Fashion," illustrated by Fay Robinson, Esq. and address the ladies with "The Ladies' Work Table," with designs for knitting, netting, crocheting, and all other kinds of work.

To Butter Makers.

THE subscribers having purchased the right of Cumberland county for making the Crown Patent Thermometer Churns, they would respectfully inform the Farmers and the public in general, that they will make and offer for sale these churns at the Carlisle Watermill of George Spangler, in North Hanover street, next door to David Smith's office. The principal advantage this churn has over all other churns is, that it is so constructed that the top can be taken off so as to give free access to the inside of the churn, which makes it convenient to put in the cream and get out the butter. A thermometer is attached to the one end of the churn so as to show the exact temperature of the cream, which experience shows should be 60 degrees to make good butter. A chamber or space is arranged around the bottom of the churn for the purpose of admitting cold or warm water, so as to bring the cream to the desired temperature without mixing the water with the cream. The secret in churning butter is to have your cream at the proper temperature—it will produce more and better butter and take less time in churning. It churns equally well in cold or warm weather, no such thing as having scalded butter—all that is necessary to make good butter all seasons of the year is to get out of Crowell's Patent Thermometer Churn. We would most respectfully invite the public to call and examine for themselves. GEORGE SPANGLER, SAM'L MYERS. Carlisle, Oct. 12, 1848.

CERTIFICATES. Mr. George Spangler. Sir—We have been using the Thermometer Churn I got of you for some time and find it far superior to the old barrel churn for several reasons. First, great saving of time in getting butter the average time of churning being about fifteen minutes, (all weathers) I have got butter in the short space of one hour. Secondly, the butter when obtained is much finer than when using any other churn. Finally, my folks say they would not exchange for any other churn and twice the original cost of the Thermometer churn. Yours, &c. GEO. W. SHEAFFER. September 28, 1848.

Mr. George Spangler. I have the Crowell Thermometer Churn you made for me in use at my place, and I do not hesitate to say that no farmer should be without one. It churns milk in all the time required to make butter, and the value of this saving of time and labor consists in this—that it requires but more time at any one season than another, and that the temperature of the cream, necessary to make butter, is produced with certainty and without the admixture of water or cold water with the cream itself. FREDK. WATTS. August 17, 1848.

To the Public. For the benefit of the better part of man (woman) I give this certificate after using the Thermometer churn made by Mr. George Spangler of this place. I have had none other in my family. We have been using the old barrel churn for thirty years past, and I must say it is not to be compared to Crowell's Thermometer Churn, either for speed of churning or fineness. In the old barrel churn it took generally from four to six hours to churn the cream, now in the Thermometer churn we can churn butter in from fifteen to twenty minutes, by bringing the cream to the proper temperature. I can recommend it to the public as no cheat. JOSEPH SHROM. September 4, 1848.
