BURRALL'S CORN SHELLER.

HE subscribe subscriber respectfully informs the farming amunity that he has purchased the right to BURRALS CELEBRATED CORN SHELLER, for the counties of Cumiverland and Franklin. Farmers who have used this Corn Sheller, pronounce it a most invaluable invention. It is simple in its construction and not liable to get out of order. It separates the corn from the cob, without breaking either, and delivers the corn clean and fit for market. It shells from ten to twenty bushels per hour. Eight hundred of them have been sold the past season by the inventor, all of which were highly approved.

Persons wishing to see the above Corn Sheller, can do so by calling at the shop of the subscriber, corner of North Hanover and Louther streets, Carlisle, where he will keep constantly on, hand a large number for half: Every farmer and miller should have the above cheap but Valuable Corn Sheller.

DAVID F. FETTER.

Carlisle, Jan: 25, 1849.—2m. for the counties of Cumberland and Franklin. Farmers who have used this Corn Sheller, pron

principal advantage this churt has over all other thurns is, that it is so constructed that the top can be taken off as as to give free access to the inside of the churn, which makes it convenient to put in the cream and get out the butter. A thermometer is attacked to the one end of the churn so as to show the exact; churn, which makes it convenient to put in the cream and get out the butter. A thermometer is attached to the one end of the churn is as to show the exact temperature of the cleam, which experience shows is should be 60 degrees to make good butter. A chamber or space is arranged around the bottom of the churn for the purpose of admitting cold or warm water secret in churning the water with the cream. This secret in churning butter is to have your cream at the proper temperature—it will produce more and better butter and take less time in churning—it churns it is necessary to make good butter—all that is necessary to make good butter all seasons of the year is to get one of Crowell's Patent Thermometer Churns. We would most respectfully invite the public to call and examine for themselves.

GEORGE SPANGLER

GEORGE SPANGLER, Carlisle, Oct. 12, 1848.

CERTIFICATES. Mr. George Spangler : Sir-We have been using the Thermometer Chur Sir—We have been using the Thermometer Churn I got of you for some time and find it far superior to the old barrel churn for several reasons. First, great saving of time in getting butter the avorage time of churning being about fifteen minutes, (all weathers) we have got butter in the short space of ten minutes. Secondly, the butter when obtained is much firmer than when using any other churn. Finally, my folks say they would not exchainge for any other churn and twice the original cost of the Thermometer churn.

Yours, &c.:

Yours. &c. ter churn. GEO. W. SHEAFER: September 28, 1848.

Mr. George Spangler : I have the Crowell Thermometer Churn you made for me in use at my place, and I do not hesitate to say that no farmer should be without it. Fifteen minutes is all the time required to make butter, and the value of this saving of time and labor consists in
