WOOD'S HOTEL, CORNER OF HIGH AND PITT STREETS, AT THE RAILROAD DEPOT, CARLISLE, BY JOHN S. WOOD.

WARM SPRINGS. PERRY COUNTY, PENNA. THE undersigned begs leave to inform the public, that he has recently purchased the Warm Springs in Perry county, Pa., and has improved and refitted the buildings for the entertainment of visitors in a style calculated to insure comfort and convenience to all who may feel disposed to patronize the establishment.

THE Springs are situated on the banks of, and empty into Sherman's creek, a stream associated with the thrilling scenes between the early settlers of that part of Pennsylvania and the aborigines, whose hunting grounds lay on its margin. They are 11 miles from Carlisle, (through which the Cumberland Valley Railroad passes from Chambersburg to Harrisburg,) from which place visitors can be accommodated by the most convenient and comfortable conveyances. Those also from the east, wishing to reach the Springs by the Central Railroad, can do so by taking passage to the Dunsmuir Iron Works, (thirteen miles distant from the Springs,) where coaches are constantly in readiness to convey them thither; and those coming from the west on the same road, can at all times obtain easy conveyances at the Railroad Hotel at Newport, which is but a few miles distant from the Springs.

The quality of the water of these Springs are most extraordinary indeed, for the speedy and permanent cure of Scrofula, Eruptions of the Skin, and every species of Cutaneous diseases. It is efficacious of scrofula, showing the wonderful cures effected by using this water internally, as well as bathing in it, obtained as well from strangers as from those residing in the immediate neighborhood of the Springs, who have not only experienced the infallible efficacy of the water themselves, but have witnessed the same upon others. Prof. James C. Booth has analyzed the waters, and found them to contain 92 grains of solid matter in the gallon, which is composed as follows:

Table listing chemical analysis of water: Carbonate of lime 2.667, Magnesia 1.988, Alkaline salts chiefly chlorides, with a portion of sulphate 1.003, Silica 0.605, Organic matter .937

There are also at the same place half a dozen of other springs, of different descriptions, among which is one of sulphur and cold water. It may be proper to state, with a knowledge of the extraordinary Medical qualities of these Springs have not been more extensively known, than is indicated by the certificates of those who have resided at the Springs, and who have been cured of various diseases, and who have been cured of various diseases, and who have been cured of various diseases.
