

American Mounteer

CARLISLE, PA., THURSDAY, JANUARY 15, 1858.

VOL. 98.

AT \$2 00 PER ANNUM.

Portrait.

Spain Light, for his Heart it Takes Under
The heart of Spain is a land of fire,
Where the sun's rays are ever burning bright,
And the people's hearts are ever burning true,
For the love of Spain is ever burning true.
The heart of Spain is a land of fire,
Where the sun's rays are ever burning bright,
And the people's hearts are ever burning true,
For the love of Spain is ever burning true.

Miscellaneous.

ST. PETER'S, AT ROME.
St. Peter's is the Niagara of edifices, having the same fall to other masterpieces of human effort that the great cataract bears to other terrestrial forms of Divine power. In either case, the first view is a sublime one, because the perfection of symmetry in the architecture is marvellous in the details, forming the basis of the grandeur in the aggregate. In viewing St. Peter's, you have a realization of bulk which is not given by any other cathedral. The architecture of St. Peter's, do not know that the cathedral has been noticed by others, but the architecture of St. Peter's is admirably proportioned. The architecture of St. Peter's is admirably proportioned. The architecture of St. Peter's is admirably proportioned.

In the afternoon, I attended the celebration of High Mass, this being observed by the Catholic world as St. Peter's Day, and the Pope himself officiating in the great Cathedral. Not understanding the services, I could not profit by it, and the spectacle was uninteresting to me. Such a multitude of organs, and bayonets seem to me strangely out of keeping in a place of worship; if they belong here, why not bring in a regiment of horse and a park of artillery as well? There is ample room for them in St. Peter's, and the cavalry might charge and the cannoniers fire a few volleys with little harm to the building, and with great increase to the numbers and the interest of the audience. I am not pretending to judge this for others, but simply to state how it naturally strikes one educated in the simple, sober observances of Puritan New England. I have heard of Protestants being converted in Rome, but it seems to me the very last place where the great body of the world would be reformed. An emblematic illustration of the fact is given by the observations of a Protestant in Rome. I have heard of Protestants being converted in Rome, but it seems to me the very last place where the great body of the world would be reformed.

THE REFORMED DRUNKARD.

An Experience Meeting.
A great "experience meeting" was held on evening in a church, where the speakers, as usual, were to be reformed drunkards. An emblematic illustration of the fact is given by the observations of a Protestant in Rome. I have heard of Protestants being converted in Rome, but it seems to me the very last place where the great body of the world would be reformed.

"Do you know him?" inquired the obliging young gentleman.
"Know him?" I should think so, replied the gentleman, "he is my uncle."
"And does he live at East-Needham?" asked the obliging young man.
"Of course he does; he never lived anywhere else."
"Well, if that don't beat everything," said the obliging young gentleman, "and I put him out at Needham, just five miles the other side of his home."
"THE REFORMED DRUNKARD."
"An Experience Meeting."

An emblematic illustration of the fact is given by the observations of a Protestant in Rome. I have heard of Protestants being converted in Rome, but it seems to me the very last place where the great body of the world would be reformed.

DOING A PUBLICAN.

A fat, burly English landlady was sitting on a bench in the street, and she was looking at a young man who was walking towards her. She was looking at him with a look of interest, and she was saying to herself, "What a fine fellow that is!"

At the last meeting of the London Geographical Society, Mr. Osborne, a member of the British Arctic expedition, argued, at some length in favor of the great Polar Ocean. He said that he had discovered a new continent, and that it was the largest continent in the world. He said that he had discovered a new continent, and that it was the largest continent in the world.

Execution of a Young Girl in California.

The following is an extract of a letter to the Journal of Commerce, dated Ophir, Placer county, Cal., Oct. 30, 1857.

It is not an explicit answer, said the counsel, somewhat perplexed by the preacher's coolness. "I wish you to explain to the court how you got into the plaintiff's manure, and how you got out of it." "I wish you to explain to the court how you got into the plaintiff's manure, and how you got out of it."

Prudence.

Prudence is not only a private, but a public virtue. It is necessary in individual conduct, in the control of families, and in the management and government of a nation. The man who is not prudent and circumspect in all his intercourse and dealings with his fellow-men, is sure to be respected and honored.

OUR OWN ZEAL.

Down is the vestibule which all must pass, before they can enter into the temple of wisdom; therefore, when we are in doubt, and puzzle out the truth by our own exertions, we have gained a something which will stay by us, and which will serve us in all our needs. Down is the vestibule which all must pass, before they can enter into the temple of wisdom; therefore, when we are in doubt, and puzzle out the truth by our own exertions, we have gained a something which will stay by us, and which will serve us in all our needs.
