PROTECTION FROM LIGHTENING!

WE respectfully offer to the public our superior Lightning Rods of Spiral-twisted Carbonized Anodized Iron with Zinc, Potassium and electroplated in their manufacture, thus rendering them equal to copper as conductors. They are made in ten foot lengths, with accurately fitted brass screw connecting joints, an entire new style of glass insulators of a novel and ingenious construction forming a lock—the whole mounted with a solid silver or gold plated point twelve inches long, which possess the power to an extraordinary extent of discharging the opposite elements of the most fearful thunder storm, and embrace every scientific improvement in lightning rods up to this time.
Thus guarding, both laterally and obliquely, the whole constitutes the most efficacious and perfect lightning rod ever presented to the public. We have not compromised safety by affording those rods at such low rates. We have given the greatest attention to their construction, so that they may be relied upon for the attaching power of the negative elements has been clearly demonstrated by the electrometer, when ungrounded points have shown that slight results through placed in the same condition. In fact they gather and silently discharge electricity from the atmosphere, when you would scarcely suspect any of being present. Our improvement having received the approval of men of science, the public are cautioned against purchasing of those who have substituted inferior imitation. Have good rods or none. We manufacture for the whole United States and for exportation to any part of the world.
All orders for rods, wires, or materials, through the Post Office, will be promptly attended to if addressed to the subscribers at Carlisle, Pa.
