Tills preparation is in common use among the Arabs who feed it to their Horses three or four times a year, for about a week at a time which no doubt is the cause of their remarkable speed and unfailing wind. It was introduced into England, some years ago, by Mr. Darley of Yorkshire, who procured the receipt from an Arabian Shick or Chief of whom he purchased a horse, during his residence in Syria, which he imported into England and was known as the 'Darley Arabian,' from which sprung the largest and most splendd horses ever known.

It will not only prevent, but it will effectually cure the above named complaints; it cleanses the breathing apparatus by removing from the air cells the lympth or secretion which in Heaves elegs them, causing a difficulty of breathing, by its action on the diseased part causes the mueus membrane to resume its natural dimensions thus equalizing the circulation of the blood and restores the vessels.

Many horses which before using this medicine were not considered worth 830, have by the use of from two to four packages, been restored to a phealthy and sound condition; the horse's appetite has been improved, all derangements of the digestive organs corrected, the skin has become out, the coat assumed a sleek and shring appearance and otherwise so much improved that they would sell readily from 880 to \$125.

The cure has been complete and permanent. It may be used at hit times with perfect safety, and may likewise be given to horned Cattle as well as Horses.
