And all this they dg, to gain political power.

Mr. Wester predicted on his dying couch, and sont the prediction to his friend Rufus Choate, that after 1862 the Whig party would exist only in history. The facts we have detailed weily that prophecy. If that great man and his still greater compeer in statesmanship, Henry Clay, were permitted to return amongst us, they would assoverate that the present Whig party is n. that which they were accustomed to advise and counsel. The respectable and high toned, though often mistaken gentlemen, who used to rally under the lead of these great statesmen, would never condenced to such a humiliating, dishonerable, and anti-republican position, as that now assumed by some of their former political associates.

It constitutes one branch of the present tactics of the opposition to the democracy to raise a clamor about the supposed diversion of the common school fund to sectarian purposes—and this matter has not been deemed beneath the dignity of a notice by the Whig State Central Committee. We will give you, follow-ciltizens, in alsayer to this charge of the opposition.

In 1833 when Joseph Ritner was Governor, and both branches of the Legislature were composed of a unjority of Whigs, the common school for heart of the found to religious denominations on certain conditions, which can be seen in all the school lawy as was re-enacted, and a feature engrafted thereon, giving a portion of the fund to religious denominations on certain conditions, which can be seen in all the school lawy as was denominations on certain conditions, which can be seen in all the school lawy as was denominations on certain conditions, which can be deen in all the

So that according to a mathematical calculation it is shown that our adopted citizens have not received that proportion of the offices either in the State or Nation, to which they are entitled by their numerical strength.

Besides of the eighteen adopted citizens ompleyed in any kind of official capacity in Pennsylvania, connected with the collection of the customs, it appears that two receive three dollars per day, and the others acting merely as night inspectors or watchmen, only one dollar and fifty-cents per day each—that nearly, if not all of them, came to this country before them grand children born here.

In the army and navy of the country, the foreigners furnish most of the rank and file, but yory few officers indeed of foreign birth are now in the public service. The disparity in this particular is marked and manifest, in favor of the native bore titles. The interest of the native bore titles under the properties of the native bore citizens.
