CUMBERLAND COUNTY AGRICULTURAL SOCIETY. The fall meeting and exhibition of the Cumberland County Agricultural Society, will com mence on the grounds of the Society, at this place, on Wednesday, the 17th inst.--to last three days. As this is the first Exhibition of the Society, we hope to see our farmers and others give the enterprise the attention and en-couragement it deserves. Every farmer in the county should at least attend the Exhibition. If he is too stingy to become a member, let him at least come in with his " quarter," and attend the Exhibition, and witness the hundreds of articles, stock, grains, implements, &c. that will be exhibited by his more enterprising

and more liberal agricultural brethren. The Agricultural Society of this county should, and we hope will be, ere long, one of the most prosperous in the State. Our valley is celebrated for the fertility of its soil and the intelligence of its farmers. Why, then, with the advantages we have over most other counties, should we not have one of the most prosperous Agricultural Societjes in the State? There are, we believe, but six counties in the State that pay a greater amount of tax into the State Treasury than Cumberland. Let us also be able to say that there are not more than six Agricultural Societies that can boast over us we set foot in it than three of the patients apin general prosperity. Of course we cannot make this boast now, for the Society is yet in its infancy, and this is its first Exhibition ; but by this time next year we hope to see the Society established upon a firm basis, and our shoulder, and wanted to draw us asido to tell ready to compete with all other County Societies, in wealth and the number of its members

proved.

Preperations have been, and are being made commensurate with the largest expectations. A beautiful spot of ground has been selected, laid out in walks, enclosed by fences, and improved in every way, that will add to the general effect, and promote the comfort of all who will be present. There will be accommodation (as the Tavern Signs read) for Man and Beast. We doubt not, we shall behold a display of mechanical ingenuity, agricultural wealth, and choly sight! Here was a poor fellow-creature well directed industry, such as never before on his knees at prayer-a few feet from him made proud the heart of Farmer, Mechanic, or was another in the very highest state of glee-Citizen. While Dynastics are crumbling in farther on could be seen a young, intelligent the old world, and weak-backed Monarchies looking man, his hands folded on his breast, are wrestling with each other for supremacy, and that "prestige" of power which they derangement he had been very pious. Then prate of as " the Divine Rights of Kings," and again a large number presented the sadest minolating upon the alter of their selfishness picture of melancholy-others again looked at Hocatombs of victims ; we, in peace, have been us with a vacant stare, and made all sorts prosperously pursuing the arts of industry, and ugly faces.
