VOL. 42  
CARLISLE, PA., THURSDAY, OCTOBER 25, 1855.  
NO. 20.  
AT \$2.00 PER ANNUM.

acknowledgment of her own errors. Thus for some time she had been sitting, when the murmur of voices from below grew more and more distinct. For a moment she remained motionless, then, with a sudden start, she descended. Various noises, as of pounding on, and throwing about chairs, and other pieces of furniture were heard, and a loud scream, mingled with angry vociferations, smote upon her ears.  
Indignation swelled instantly in the heart of Mrs. Lyon, and hurriedly placing the sleeping baby in its berth, she started for the second order, moved by an impulse to punish severely the young rebels against her authority, and was half way down the stairs, when her feet were checked by remora's grasping hand. "All right government of children begins with self-government."

men with whom we have done great wrongs, which they observed during the expedition. An area of three thousand square miles has been seen entirely bare. The expedition, named after the Hon. J. D. Grinnell, into the interior of the Arctic region, under the command of Lieut. George A. Brown, U. S. A., and accompanied by a party of volunteer officers and men, is the largest body of men ever sent to the pole yet known. It bears the name of Mr. Henry Grinnell, who was the first to propose it.  
The expedition was undertaken on the 28th of May, 1855, and consisted of a party of about thirty men, including the commanding officer, Lieut. George A. Brown, and several other officers and men. The party was equipped with a heavy outfit of provisions, and a small schooner, the "Albatross," which was built for the purpose of the expedition. The schooner was commanded by Lieut. Brown, and was accompanied by a small party of men, including the commanding officer, Lieut. Brown, and several other officers and men.  
The expedition was successful in its objects, and returned to the coast on the 10th of August, 1855. The party was well preserved, and the schooner was found in good condition. The expedition was the largest ever sent to the pole yet known, and it has opened up a new field of exploration.

### Medical.

#### The World Within.

Many tell us that the world is a vast and wonderful place, and that the things which we see and hear are the result of the laws of nature. But what is the world within us? What are the things which we feel and think, and what are the causes of them? These are the questions which the medical science has sought to answer, and which it has answered in a way which is both interesting and instructive.

#### From the Cincinnati Price Current.

#### Foreign Demand for Breadstuffs.

Our articles from Europe, by the last steamer, leave no doubt whatever that the crops in France are below an average; also, in the case of the American States; and, that, these countries, instead of being exporters, must, as a matter of necessity, be importers of breadstuffs. The Paris Monitor, of the 22nd inst., contains a translation of the French Government, that there is a deficit in the harvest of the Empire this year, equal to 17,000,000 bushels; to make up for which, it is necessary to import 10,000,000 bushels of foreign sources. This harvest deficit is based upon the fact that the crops in France and Germany are below an average, and that the United States is in a position, commercially and financially, to supply the deficit.

#### Miscellaneous.

#### COMING DOWN.

BY ALICE CAREY.

Mr. and Mrs. Dexter began to live with a fortune; they had one of the finest houses in town, and of course, it was the most fashionable and the most expensive. They had a great many servants, and a great many guests. They had a great many pleasures, and a great many pains. They had a great many friends, and a great many enemies. They had a great many things, and a great many things that they did not want.

#### The Family-Home Scenes.

BY T. S. ARTHUR.

"I'll not live in this way!" exclaimed Mrs. Lyon passionately. "Such disorders, wrangling, and irregularity, rob me of peace, and make my home a hell. I will have a quiet home, Tom! She spoke sharply to a bright little fellow, who was pouring away with a wooden hammer on a chair and making a most intolerable racket. Mrs. Lyon, who was sitting on the sofa, turned round and looked at him with a stern expression on her face. "You are a very good fellow, but you must not make such a noise. You are disturbing the peace of the house."
