ions hong Sermons.

A writer in the London Quarterly Review, i an article entitled "Home Heathenism," makes the following comment on "the immoderate length of sermons"-which we shall extract for nefit of the clergy and others :

the benefit of the clergy and others : "The length of the inodern sermon is a great disadvantage and a growing evil; but it is not the main cause of listleness in the hearer; for it is not the last portion which tires us; we are lired before we get that relief; and there are long sermons which usere appear long. The fault is both in the matter and the style. The fault is both in the matter and the style. The topics are too generally stale, and extremely limited in their range; the public mind wants variety and freshness. The mass of the truths mattered from the pulpit need no proof; it is an limited in their ange: the public mind wants variety and freshness. The mass of the truths nttered from the pulpit need no proof; it is an idle waste of patience and skill to offer it. If all vain repetitions of thought were excluded, and the best of the remainder were alone re-tained, sermons would not be so unreasonably long. And generally the style is too verbose; it is not close, compact, nervous. The rale might be, to see how much space the gold can be made to cover : the practice is, not to be perspicuous, convincing, brief. The word-pain-ter fails to exhibit his own thought, probably because it is not clearly conceived by himself; for he who thinks clearly and vigoriously will express himself with sufficient perspicuity : for he who thinks clearly and vigoriously will express himself with sufficient perspicuity ; thought shapes the style. The one radical er-ror, not universal, but general, is excessive ver-biage—vite seven grains are hid under a bush-el of chaff." We are of opinion that it is the sin of the age ; and indiscreet persons freely bestow their praises upon young ninisters— especially if they have plenty of bold 'figures' in personetion to their being unable to rememproportion to their being unable to remem-r anything that is said. The cloud land style is, in our judgment, the most offensive ; an accumulation of what are no better than cant terms, compound epithets, and words without definite singifications, and these are

often accumulated into an incongrous mass of unintelligible jargon; yet, with many, this constitutes fine writing and speaking !"

The Human Beard.

Have our readers ever thought of the inter-folly of shaving, the absurdity of the practice of how most is the natter, and tells her what to do of cotting off the beard which was not given by his Oreator for nothing? We have come to the conclusion that the practice of shaving is alike ridsculous and absurd, and that it vio-lates one of the laws of nature. Now our beard was not given us for no pur-pose-that is evident. It was created for some and nee warm, and thus be conducive to health. Let us look at a fact. It has been calculated that if one shave three times a week, it grows twenty times as fast as though he did not shave, the beard, it will be seen that a man cuts off forty inches, or more than a yard of har a year, and the nutriment which supports thes, and for his body, and render him a healthy and hundome man? Again : allowing twenty iminutes to each shaving operation, three times a week, a mounts to one hour a week. fifty rown bours a year. Suppose a man to shave forty years, we find he has consumed about three months in the simple process of shaang.

STARTLING, BUT TRUE! Warning to Every Sensible Woman.

WHY FEMALES SUFFER IN HEALTH.

WHY FERGAGES SUFFER IN HEATT. NO woman of delicacy is willing to disclose the poculiar aliments incident to her sox, even to a most intimate family physician. This modesty and delicacy is implanted by nature, and neither should nor need be aubjec-ted to the rade shocks inevitable in making exclusively to the female. Except in extreme cases, her sensitiveness will sacrifice her health rather than her deticacy.

Bacept in extreme cases, her sensitiveness, witt sacrifice her health rather than her delicacy. The consequences are serious, hamentable, and lite-long. Thus what at first could have been easily rem-edied, or perhaps better still, not incurred, be-comes a complication of diseases, not only ruin-ing the health of the mother, and embiltering her days by sickness and suffering, but entailing broken constitutions upon her children, and embarassing, if not distressing, the business and pecuniary prospects of the hushand. Let every sensible woman take warning in time, (as thousands hare done) by the bitter experience and sufferings of others, of the dreadTui conse-quences she entails upon herself and those en-deared to her, by her ignorance of the simplest and plainest rules of health as connected with the marriage state, the violation of which entails disease, suffering and misery. How many are suffering from obstructions or irregularities poculiar to the female system, which undermine the health, the effects of which they are ignorant, and for which their delicacy torbids socking medical advice! How many suffer from *plotapsur* uteri (falling of the womb)) or from *fluor albu*: (weakness, debility, &c.) '--How many are in constant agony for many months preceding confinement! How many have diffi-cult, if not dangerous deliveries, and slow and uncertain recoveries!

To the question, how are these to be preven ed 1 what shall be done 1 the answer is simple Let every woman ascertain for the answer is sumple. Let every woman ascertain for herself, with-out violence to her delicacy, the nature and character of the ailment (to which she as a fe-nule is subject) the causes from which it may arise, and the proper remedies for its cure and future prepention

uture prevention. This she can do by possessing a little volume (already possessed by thousands) which tells her what is the matter, and tells her what to do

F. II. SMITH,

Here every woman can discover, by compar-ing her own symptoms with those described, the nature, character, causes of, and the proper re-medies for, her complatats. The wife about becoming a mother has often need of instruction and advice of the utmost importance to her future health, will find such instruction and advice, and also explain man symptoms which otherwise would occasion anx

Dartos, May 1, 1847. Dr. A. M. Mauricean: "My wite has been perceptibly sinking for some three years or more, in consequence of her great anguish and suffering some months before and during confinement; every successive one more and more debilitated and prostration her, putting her life in immunent danger, and which was on the last occasion despatred of. I suppo-sed that this state of things was inevitable, and resigned myself to meet the worst. At this time (now about two months) I heard your book highly spoken of, as containing some matters reaching my case. On its receipt and perusal, I cannot express to you the relief it afforded my distressed mind, and the joy its pages imparted to my wife, on learning that the great discovery of M. M. Desomeax provided a remedy. If upened a prospect to me which I little conceiv-ed was possible.
