May 22, 1856—tf.

Yours Respectfully, JOHN S. STERRETT.

CARLISLE, Oct. 9, 1655.
To J. S. WRIGHT, Esq.—Don't Sir—In July last I purchased of your agent in Garilale. II. In Burkholder, one of Akkin's Soli-Raking Roaping Machines, and can safely recommend it as

the most complete, economical labor-saving machine of the kind yet introduced into this part of the country; although my farm is hilly, it performed its work to my entire satisfaction, and to the admiration of a great number of farmers who were present on the occasion of its trial. Besides making the cleanest work of any Reaper I have over seen, it requires but half the power to move it that Reapers do generally. Two horses or mules can draw it with ease, though I used four on account of the land being somewhat rough and uneven.

though I used nor of account of the matter of somewhat rough and uneven.

To all farmers having large crops to cut I would advise as a matter of convenience and economy to procure one of Atkin's Sek-raking teaping Machines. Yours Respectfully, JACB NOFFSINGER.

The change from Reaper to Mover is very sumple and made in a few minutes; and a wheel in attached to the outer end of the moving her, to regulate the height of cutting, to facilitate backing, and move from fleld to fleld.

Points to Consider in Buying a Reaper 1, to gramer, by houself or with a neighbor, should have a Reaper 1 tryon have none, or even if you have an old trishlound back-breaker, you will look for our 1st—To cut well, clgin and casy, and with a significant does not vehicle.
