The Alkin's Self-Raking Reaper and Mower, for 1857, is now ready and on hand. YOU will save money and labor and avoid injuring your horses by purchasing the Self-Raker. Renomber how many good horses had their necks ruined by working in Mowing Reaping machines with a side draft. We think, we can satisfy you, that, the Solf-Raker is by lar the best machine in use, having more valua-ble improvement than can be chimed by any other. It positively is easy work for two horses by raking the grain ready for binding. This saves two men each day. Machines, that a man has to ride on to do the taking, are dangerous, and is the hardest work over done by man. One cut and rake the Atkins Self-Raker, and alone to hard work about it. It cuts gras uncom-mondy well and very rapidly, and has no equal as a combined machine. Somo bad machines were put out last season through bad manage-ment that din to work well; but the Atkins grain and grass cutter has been axarded more a premiums than any other machine in existence. All be markines for the season are good and in I perfect order. This celebrated and unequaled a reamines for a the season are good and in I perfect order.  WITH WOOD'S IMPROVEALEN 1.
 In putting these machines into the market for the barvest of 1857, I have the bast grounds for believing they will meet an extensive sale, of cumberland county as they have proved here-tofore. Up to this time there has not been another formers and that has succeeded to an extent that will meet a many flacturer in building, or a farmer in buying it for a Combined Machine, as made by Wood, has been so successful for both purposes, Reaping and Mowing, that in sections where they have been used, their realistily is a well established as that of any officer implement used by the farmer.
