The Five Points.

The following paragraph, from the New York Express, gives an idea of the fearful accretion of vice and squalor in the field of labor occupied by the Five Points' Mission :

"In attending to his duties recently, Mr. Pease found a dying woman in a foul apartment in Cow Bay, occupied also by eight other women and one man, all drunken and debased and infamous in the last extreme. In the upper end of the same postilent court, or close, were found, in fifteen rooms, twenty-three families, making an aggregate of one hundred and seventy-nine persons, or twelve to a room! In five of these fifteen rooms, intoxicating liquors were kept for sale! Indescribable filth, privation, disease and indecency reigned through them all. Yet seventeen children from these rooms attend the schools of the House of Industry. In eleven other rooms were eighteen families, and in nearly half of these rooms spirits were sold. In one of the garrets lived two negroes with eleven abandoned white women. In twelve other rooms were found twenty-four families, consisting of one hundred and twenty-four persons. Here were two blind women, two just past the peril of child-birth, and seventy-one were children, only eight of whom attended any school."

Dr. Hardman treats Consumption, Bronchitis, Asthma, Larryngittis, and all diseases of the throat and lungs by medical Inhalation, lately used in the Bromton Hospital, London. The great point in the treatment of all human mala-dies is to get at the disease in the direct man-ner. All medicines are estimated by their action upon the organ requiring relief. This is the important fact upon which Inhalation is based. If the stomach is diseased we take medicine directly into the stomach. If the lungs are diseased, breathe or inhale medicated va-

Inhalation is the application of this principle to the treatment of the lungs, for it gives us direct access to those intricate air cells and tubes which lie out of reach of every other means of administering nedicines. The reason that Consumption, and other diseases of the lungs have heretofore resisted all treatment has hoon been becaused. sisted all treatment has been been because the had never been approached in a direct manne by medicine. They were intended to act upon the lungs and yet were applied to the stomach.

Their action was intended to be local, and yet they were so administered that they should act constitutionally, expending immediate and prin-cipal action upon the unoffending stomach, whilst the foul ulcers within the lungs were unnolested. Inhalation brings the medicine is direct contact with the disease, without the dis anvantage of any violent action. Its applica-tion is so simple that it can be employed by the youngest infant or feeblest invalid. It does not derange the stomach, or interfere in the least

occasion may require, to publish my reminis-cences of the public men with whom I have been associated during the last twenty-eight years. Anecdotes of General Jackson, and the leaders of the party which he conducted, and the leading men of other parties, will, I believe, be interesting now, when partizan bitterness has abated.
