sburg, (Union House,) Saturday, February 20. Dr. Hardman treats Consumption, Bronchitis. Asthma, Larryngittis, and all diseases of the throat and lungs by medical Inhalation, lately used in the Bromton Hospital, London. The great point in the treatment of all human maladies is to get at the disease in the direct manner. All medicines are estimated by their action upon the organ requiring relief. This is ors, Linen and Silk Hakis, &c. the important fact upon which inhalation is based. If the stomach is diseased we take medicine directly into the stomach. If the lungs are diseased, breathe or inhite medicated va-pors directly into the lungs. Medicines are the antidotes to disease and should be applied to antidotes to disease and should be applied the very seat of disease. Inhalation is the application of this principle to the treatment of the lungs, for it gives us direct access to those the lungs, for it gives the lungs, for it gives us direct access to those the lungs, for it gives the l air cells and tubes which lie out of reach of every other means of administering medicines. The reason that Consumption, and other diseases of the lungs have heretofore resisted all treatment has been been because they sisted all treatment has been been because they had never been approached in a direct manner by medicine. They were intended to act upon the lungs and yet were applied to the stomach. Their action was intended to be local, and yet they were so administered that they should act constitutionally, expending immediate and principal action upon the unoffending stomach, whilst the foul ulcers within the lungs were, unpercentaged.
