MATEST NEWS FROM EUROPE. - We have three days later news from Europe, by the arri; val of the steamship America, from Liverpool In the English markets cotton was active, with an advance in prices; breadstuff's were depressed, and there was an advance in Consols. The barque Leander, of Bath. Me., from Liverpool, on her way to New Orleans, with a cargo of salt, was sunk on the 11th ult., by a collision with the steamship North America, and the second mate, eight seamen, and the captain's wife were drowned eleven others, besides the captain, being saved by the steamer. In the British House of Commons, Lord Palmerston had moved for leave to bring in his new India bill. It proposes to abolish the Court of Directors, and establish a Council, to be composed mainly of persons who had been in India, or who were acquainted with Indian affairs. The matter was debated at some length without any result. The Bank of England had reduced its rate of discount to three per cent.

Messrs. Banks, Hale, and Seward; John C. Fremont is as yet unspoken of, and is not like to be. He has already experienced a defeat, which was very unpleasant to him no doubt. Kansas will have to ready experienced a deteat, which was very the pleasant to him no doubt. Kansas will have to bleed more profusely than she did at the last Campaign in order to accomplish a President, so you had better be whetting up your knives.

Quarters had been prepared for him at the House of a distinguished Mexican, and it was a settled fact that he would return. A correspondent at Havana says: "What part Spain may play in the game is hard to tell at present but it is generally helicated that may at present, but it is generally believed that men and vessels of war have been promised in case of hostility on the part of the opposing faction. Spain will receive her full claims by virtue of a new treaty; the rough draught of which has been dition against Vera Cruz, as Santa Anna's return removes all necessity for the employment of Her Majesty's troops. Physician for Diseases of the Lungs, Throat and Heart-formerly Physician to the

Author of "Letters to Invalids," is coming! MARCH APPOINTMENTS.

March 24.

Dr. Hardman treats Consumption, Bronchitis,
Asthma, Larryngittis, and all diseases of the
throat and lungs by medical Inhalation, lately
used in the Bromton Hospital, London. The
great point in the treatment of all human maladies is to get at the disease in the direct manner. All medicines are estimated by their action upon the organ requiring relief. This is
the important fact upon which Inhalation is
based. If the stomach is diseased we take medicine directly into the stomach. If the lungs icine directly into the stomach. If the lungs are diseased, breathe or inhale medicated va-pors directly info the lungs. Medicines are the antidotes to disease and should be applied to the very seat of disease. Inhalation is the application of this principle to the treatment of the lungs, for it gives us direct, access to those intricate air cells and tubes which lie out of reach of every other means of administering medicines. The reason that Consumption, and medicines. The reason that Consumption, and other diseases of the lungs have heretofore resisted all treatment has been been because they had never been approached in a direct manner by medicine. They were intended to act upon the lungs and yet were spalled to the stomach. Their action was intended to be local, and yet they were so administered that they should act they were so administered that they should act to the stomach.
