This is the important fact upon which Inhalation is based. If the stomach is diseased we take med-C. . HEDGES | icine directly into the stomach. If the lungs are diseased, breathe or inhale medicated va-pors directly into the lungs. Medicines are the antidotes to disease and should be applied to the very seat of disease. Inhalation is the application of this principle to the treatment of the lungs, for it gives us direct access to those intricate air cells and tubes which lie out of Nebraska and Missouri; money invested, taxes paid, and titles investigated, for non-residents.
