Important to Females. DR. CHEESEMAN'S PILLS.

THE combinations of ingredients in these Pills, is the result of a long and extensive practice; they are mild, in their operation, and certain of restoring nature to its proper channel. In every instance have the Pills proved successful. They are certain to open those obstructions to which females are liable, and bring nature into its proper channel, whereby health is restored, and the pale and deathly countenance changed to a healthy one. No female can enjoy good health unless she is regular; and whenever an obstruction takes place, whether from exposure, cold, or any other cause, the general health immediately begins to decline, and the want of such a remedy has been the cause of so plany consumptions among young females. In every instance have the Pills proved successduisitions, examinations which to their offices brances, to do those things which to their offices appertain to be done, and all those that are bound by recognizances, to prosecute against the prisoners that are or their shall be in the Jail of said country, are to be there to prosecute them as shall be just.
