

To Bridge Builders.

The Commissioners of York and Cumberland counties will, on the 17th day of August, A. D. 1859, at the house of Benjamin C. Atter, at Breeseport, proceed to the contracting for building a Wooden Bridge over Yellow Breeches creek, at Coover's mill, in York and Cumberland counties. The bridge to be of the following dimensions, viz: It shall be in length 100 feet in the clear, from one abutment to other, and 16 feet wide in the clear, with two abutments each 12 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. The bridge is to be closely weatherboarded with half inch pine boards, well lapped. The whole of the work of said bridge to be roofed with good and sufficient pine shingles; said roofing to extend at least 10 feet over the head of the arch or top of the abutments, and on each side of the bridge over the weatherboarding 2 feet. The abutments are to be built of stone, and to be approved of by the Commissioners, the whole of the mason work to be well built of large and hard stone, lime and mortar, and pointed from the back of the abutment. The filling shall consist of earth and stone, and to be supported with wing walls on each side 5 feet thick at the two abutments, with a battering of 1 inch to the foot to the top of the filling, and to extend in that manner on to the extreme sides of each abutment. The work on the out and inside of the bridge, with an ascent not exceeding an angle of 4 degrees elevation from the road to the bridge, with curbs well finished, length and thickness, and good drainage, to be secured. The work on the out and inside of the bridge to be whitewashed with two coats of lime. The undertaker to furnish all materials and give such security as the Commissioners may require for the faithful performance of the workmanship, and the permanency of said bridge for and during the term of seven years; said bridge is to be built on the same place as the one over the Little Conowing, at Newman's mill.

The Commissioners will also at the same time and place, receive proposals for building a Stone Bridge, over the same place, of the following dimensions, viz: to contain in length 100 feet from one abutment to the other, and 16 feet wide in the clear. The two abutments each to be 16 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. The bridge is to be closely weatherboarded with half inch pine boards, well lapped. The whole of the work of said bridge to be roofed with good and sufficient pine shingles; said roofing to extend at least 10 feet over the head of the arch or top of the abutments, and on each side of the bridge over the weatherboarding 2 feet. The abutments are to be built of stone, and to be approved of by the Commissioners, the whole of the mason work to be well built of large and hard stone, lime and mortar, and pointed from the back of the abutment. The filling shall consist of earth and stone, and to be supported with wing walls on each side 5 feet thick at the two abutments, with a battering of 1 inch to the foot to the top of the filling, and to extend in that manner on to the extreme sides of each abutment. The work on the out and inside of the bridge, with an ascent not exceeding an angle of 4 degrees elevation from the road to the bridge, with curbs well finished, length and thickness, and good drainage, to be secured. The work on the out and inside of the bridge to be whitewashed with two coats of lime. The undertaker to furnish all materials and give such security as the Commissioners may require for the faithful performance of the workmanship, and the permanency of said bridge for and during the term of seven years; said bridge is to be built on the same place as the one over the Little Conowing, at Newman's mill.

The Commissioners will also at the same time and place, receive proposals for building a Stone Bridge, over the same place, of the following dimensions, viz: to contain in length 100 feet from one abutment to the other, and 16 feet wide in the clear. The two abutments each to be 16 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. The bridge is to be closely weatherboarded with half inch pine boards, well lapped. The whole of the work of said bridge to be roofed with good and sufficient pine shingles; said roofing to extend at least 10 feet over the head of the arch or top of the abutments, and on each side of the bridge over the weatherboarding 2 feet. The abutments are to be built of stone, and to be approved of by the Commissioners, the whole of the mason work to be well built of large and hard stone, lime and mortar, and pointed from the back of the abutment. The filling shall consist of earth and stone, and to be supported with wing walls on each side 5 feet thick at the two abutments, with a battering of 1 inch to the foot to the top of the filling, and to extend in that manner on to the extreme sides of each abutment. The work on the out and inside of the bridge, with an ascent not exceeding an angle of 4 degrees elevation from the road to the bridge, with curbs well finished, length and thickness, and good drainage, to be secured. The work on the out and inside of the bridge to be whitewashed with two coats of lime. The undertaker to furnish all materials and give such security as the Commissioners may require for the faithful performance of the workmanship, and the permanency of said bridge for and during the term of seven years; said bridge is to be built on the same place as the one over the Little Conowing, at Newman's mill.

The Commissioners will also at the same time and place, receive proposals for building a Stone Bridge, over the same place, of the following dimensions, viz: to contain in length 100 feet from one abutment to the other, and 16 feet wide in the clear. The two abutments each to be 16 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. The bridge is to be closely weatherboarded with half inch pine boards, well lapped. The whole of the work of said bridge to be roofed with good and sufficient pine shingles; said roofing to extend at least 10 feet over the head of the arch or top of the abutments, and on each side of the bridge over the weatherboarding 2 feet. The abutments are to be built of stone, and to be approved of by the Commissioners, the whole of the mason work to be well built of large and hard stone, lime and mortar, and pointed from the back of the abutment. The filling shall consist of earth and stone, and to be supported with wing walls on each side 5 feet thick at the two abutments, with a battering of 1 inch to the foot to the top of the filling, and to extend in that manner on to the extreme sides of each abutment. The work on the out and inside of the bridge, with an ascent not exceeding an angle of 4 degrees elevation from the road to the bridge, with curbs well finished, length and thickness, and good drainage, to be secured. The work on the out and inside of the bridge to be whitewashed with two coats of lime. The undertaker to furnish all materials and give such security as the Commissioners may require for the faithful performance of the workmanship, and the permanency of said bridge for and during the term of seven years; said bridge is to be built on the same place as the one over the Little Conowing, at Newman's mill.

The Commissioners will also at the same time and place, receive proposals for building a Stone Bridge, over the same place, of the following dimensions, viz: to contain in length 100 feet from one abutment to the other, and 16 feet wide in the clear. The two abutments each to be 16 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. The bridge is to be closely weatherboarded with half inch pine boards, well lapped. The whole of the work of said bridge to be roofed with good and sufficient pine shingles; said roofing to extend at least 10 feet over the head of the arch or top of the abutments, and on each side of the bridge over the weatherboarding 2 feet. The abutments are to be built of stone, and to be approved of by the Commissioners, the whole of the mason work to be well built of large and hard stone, lime and mortar, and pointed from the back of the abutment. The filling shall consist of earth and stone, and to be supported with wing walls on each side 5 feet thick at the two abutments, with a battering of 1 inch to the foot to the top of the filling, and to extend in that manner on to the extreme sides of each abutment. The work on the out and inside of the bridge, with an ascent not exceeding an angle of 4 degrees elevation from the road to the bridge, with curbs well finished, length and thickness, and good drainage, to be secured. The work on the out and inside of the bridge to be whitewashed with two coats of lime. The undertaker to furnish all materials and give such security as the Commissioners may require for the faithful performance of the workmanship, and the permanency of said bridge for and during the term of seven years; said bridge is to be built on the same place as the one over the Little Conowing, at Newman's mill.

The Commissioners will also at the same time and place, receive proposals for building a Stone Bridge, over the same place, of the following dimensions, viz: to contain in length 100 feet from one abutment to the other, and 16 feet wide in the clear. The two abutments each to be 16 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. The bridge is to be closely weatherboarded with half inch pine boards, well lapped. The whole of the work of said bridge to be roofed with good and sufficient pine shingles; said roofing to extend at least 10 feet over the head of the arch or top of the abutments, and on each side of the bridge over the weatherboarding 2 feet. The abutments are to be built of stone, and to be approved of by the Commissioners, the whole of the mason work to be well built of large and hard stone, lime and mortar, and pointed from the back of the abutment. The filling shall consist of earth and stone, and to be supported with wing walls on each side 5 feet thick at the two abutments, with a battering of 1 inch to the foot to the top of the filling, and to extend in that manner on to the extreme sides of each abutment. The work on the out and inside of the bridge, with an ascent not exceeding an angle of 4 degrees elevation from the road to the bridge, with curbs well finished, length and thickness, and good drainage, to be secured. The work on the out and inside of the bridge to be whitewashed with two coats of lime. The undertaker to furnish all materials and give such security as the Commissioners may require for the faithful performance of the workmanship, and the permanency of said bridge for and during the term of seven years; said bridge is to be built on the same place as the one over the Little Conowing, at Newman's mill.

The Commissioners will also at the same time and place, receive proposals for building a Stone Bridge, over the same place, of the following dimensions, viz: to contain in length 100 feet from one abutment to the other, and 16 feet wide in the clear. The two abutments each to be 16 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. The bridge is to be closely weatherboarded with half inch pine boards, well lapped. The whole of the work of said bridge to be roofed with good and sufficient pine shingles; said roofing to extend at least 10 feet over the head of the arch or top of the abutments, and on each side of the bridge over the weatherboarding 2 feet. The abutments are to be built of stone, and to be approved of by the Commissioners, the whole of the mason work to be well built of large and hard stone, lime and mortar, and pointed from the back of the abutment. The filling shall consist of earth and stone, and to be supported with wing walls on each side 5 feet thick at the two abutments, with a battering of 1 inch to the foot to the top of the filling, and to extend in that manner on to the extreme sides of each abutment. The work on the out and inside of the bridge, with an ascent not exceeding an angle of 4 degrees elevation from the road to the bridge, with curbs well finished, length and thickness, and good drainage, to be secured. The work on the out and inside of the bridge to be whitewashed with two coats of lime. The undertaker to furnish all materials and give such security as the Commissioners may require for the faithful performance of the workmanship, and the permanency of said bridge for and during the term of seven years; said bridge is to be built on the same place as the one over the Little Conowing, at Newman's mill.

The Commissioners will also at the same time and place, receive proposals for building a Stone Bridge, over the same place, of the following dimensions, viz: to contain in length 100 feet from one abutment to the other, and 16 feet wide in the clear. The two abutments each to be 16 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. The bridge is to be closely weatherboarded with half inch pine boards, well lapped. The whole of the work of said bridge to be roofed with good and sufficient pine shingles; said roofing to extend at least 10 feet over the head of the arch or top of the abutments, and on each side of the bridge over the weatherboarding 2 feet. The abutments are to be built of stone, and to be approved of by the Commissioners, the whole of the mason work to be well built of large and hard stone, lime and mortar, and pointed from the back of the abutment. The filling shall consist of earth and stone, and to be supported with wing walls on each side 5 feet thick at the two abutments, with a battering of 1 inch to the foot to the top of the filling, and to extend in that manner on to the extreme sides of each abutment. The work on the out and inside of the bridge, with an ascent not exceeding an angle of 4 degrees elevation from the road to the bridge, with curbs well finished, length and thickness, and good drainage, to be secured. The work on the out and inside of the bridge to be whitewashed with two coats of lime. The undertaker to furnish all materials and give such security as the Commissioners may require for the faithful performance of the workmanship, and the permanency of said bridge for and during the term of seven years; said bridge is to be built on the same place as the one over the Little Conowing, at Newman's mill.

The Commissioners will also at the same time and place, receive proposals for building a Stone Bridge, over the same place, of the following dimensions, viz: to contain in length 100 feet from one abutment to the other, and 16 feet wide in the clear. The two abutments each to be 16 feet thick at the bottom, with a battering wall of one inch to the foot on the three upper sides, and an abutment to be 16 feet high from the bottom of the creek to the cord line, from which the wooden arches are to be started and extend across said creek from one abutment to the other; and to be single floored with 8 inch white oak plank, and raised in the centre 12 inches; the sides and gable ends of said bridge to be of sufficient height to admit coverage of hay wagons to pass through the same. Cumberland Valley Bank. PROPRIETORS, WILLIAM KER, MELCHOR BRENNEMAN, ROBT. C. STREIBER, JOHN DUNFAP, RICH'D. WOODS, JOHN S. STREIBER, JOHN C. DUNFAP, H. A. STURGEON. THIS Bank, doing business in the name of the Cumberland Valley Bank, is now fully prepared to do a general Banking Business with promptness and fidelity. Money received on deposit and paid back on demand, without interest. Interest paid on Special deposits. Certificates of deposit bearing interest at the rate of five per cent, will be issued for as short a period as four months. Interest on all certificates will cease at maturity unless renewed. The collection of notes, drafts, checks, &c., in any part of the United States or Canada, renewed at any time thereafter for another given period, they shall bear the same rate of interest up to the time of renewal. Particular attention will be paid to the collection of notes, drafts, checks, &c., in any part of the United States or Canada. Remittances made to England, Ireland, or the Continent. The faithful and confidential execution of all orders entrusted to them, may be relied upon. They call the attention of Farmers, Mechanics and all others who desire a safe depository for their money, to the fact, that the proprietors of this Bank are individually liable to the extent of their estates for all the Deposits, and other obligations of Ker, Brenneman and Co. The Bank recently removed into their new Banking House, directly opposite their former stand, in West Main Street, a few doors east of the Railroad Depot, where they will at all times be pleased to give any information desired in regard to money matters in general. Open for business from 9 o'clock in the morning until 4 o'clock in the evening. H. A. STURGEON, Cashier. Carlisle, Dec. 18, 1856.
